This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Release 2.7.0 Service Pack 10

Corrected Issues

BEN-5808: Accepted Eportal Filing Stuck and not Showing in Benchmark

Expected Result: System not processing and appears to be stuck when spaces are present in one of the case number fields.

Resolution: Reverted the code to v2.7.0.7 release and added in BEN-5808 code changes. The code will remove all spaces in the case number in both incoming and database fields for it to match.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Added Features

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Release 2.7.0 Service Pack 9

Corrected Issues

BEN-5808: Accepted Eportal Filing Stuck and not Showing in Benchmark

Expected Result: System should find casenumber with no spaces in case number.

Resolution: Added a new method to check for casenumber with no spaces in either database field or parameter case number variable.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Added Features

11911: Capture Claim Amount from XML

Request Details: System should be able to receive claim amount data from XML files.

Resolution: Adjusted processing logic to capture and map data to tblCase.Jury column.

11912: Capture Jury Trial from Submitted XML

Request Details: System should be able to receive JuryDemandIndicator value from XML files.

Resolution: Adjusted processing logic to capture JuryDemandIndicator if it exists and map it to tblCase.Jury.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Release 2.7.0 Service Pack 7

Corrected Issues

N/A

Added Features

11911: Capture Claim Amount from XML

Request Details: System should be able to receive claim amount data from XML files.

Resolution: Adjusted processing logic to capture and map data to tblCase.Jury column.

11912: Capture Jury Trial from Submitted XML

Request Details: System should be able to receive JuryDemandIndicator value from XML files.

Resolution: Adjusted processing logic to capture JuryDemandIndicator if it exists and map it to tblCase.Jury.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Release 2.7.0 Service Pack 1

Corrected Issues

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.

Added Features

11063: Process Without Filer Information

Request Details: System should be able to receive filings from the portal without filer data.

Resolution: Adjusted processing logic to let the file through without full filer information.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Benchmark users.
