Release 1.0.57.0

Corrected Issues

111332: Martin County: WWW Needs to be Removed from Jury Web

Expected Result: www on the label and default text for email address should be removed.

Resolution: Removed www from email address label.

Added Features

N/A

Release 1.0.56.0

Corrected Issues

110445: Juror Notification History Records Tie to JurorID Instead of PoolJurorID

Expected Result: In Jurors screen -> History tab, Pool ID column should populate the pool juror Id in the juror history grid.

Resolution: Fixed issue where history records for email and text notifications were saving JurorId in the PoolJurorId column.

110508: The Questionnaire Responses Do Not Tie to the PoolJurorID if the Juror is on a Panel

Expected Result: The questionnaire responses for two-step summoning counties should tie to a PoolJurorID if the juror is on a panel.

Resolution: The questionnaire responses for two-step summoning counties will now populate the PoolJurorId in addition to the PanelJurorId.

The questionnaire responses are tied to the PoolJurorID:

Results | Messages

	Id	QuestionnaireItemId	Response	CreateDate	CreateByUserId	ModifyByUserId	ModifyDate	PoolJurorId	PanelJurorId

Added Features

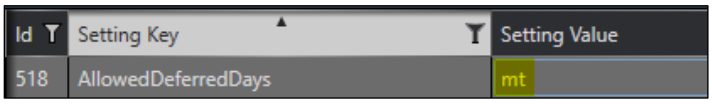

14919: Add Ability to Set Allowed Deferred Days Based on Pool Type

Request Details: The users would like to be able to control which days of the week are allowed for deferred/rescheduled jurors based on the pool type, when selecting the Postponement option in the Excusal Requests tab.

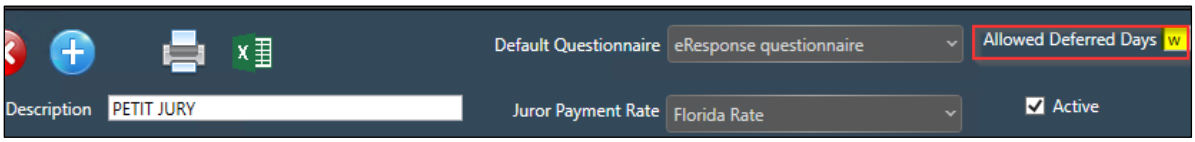

Resolution: Added the AllowedDeferredDays field to the PoolTypes table, if there is a value entered for a specific pool type then it will be used, otherwise any pool type where there is no value will use the value in the setting: **AllowedDeferredDays** in the Settings table instead.

Days of the week allowed for deferred/rescheduled jurors: m=Mon, t=Tue, w=Wed, r=Thu, f=Fri, s=Sat, n=Sun. To allow all the days of the week enter: mtwrfsn. See the example below.

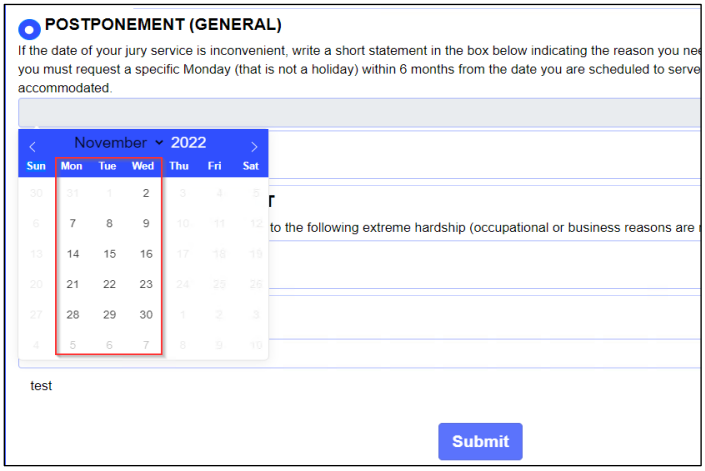

The **AllowedDeferredDays** setting in the Setting table is set to allow Monday and Tuesday (mt) for deferred/rescheduled jurors:

The AllowedDeferredDays field in the pool type: Petit Jury is set to allow Wednesday (w) for deferred/rescheduled jurors:

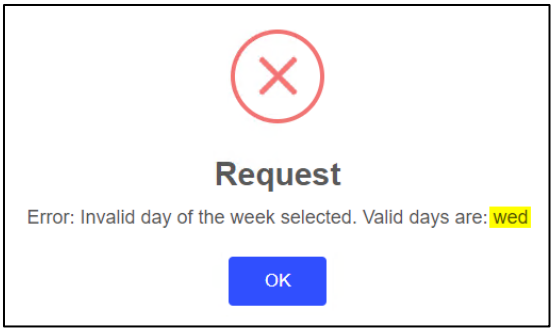

When a user selects the Postponement option and attempts to enter a date for deferred/rescheduled jurors, the calendar will show all the days of the week available for the global setting (set to mt) and all the pool types (Petit Jury set to w):

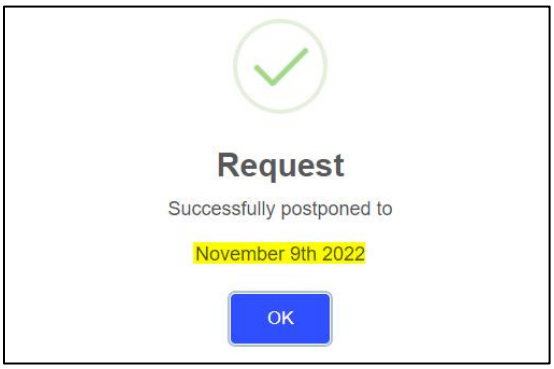

After clicking the Submit button JuryMark will check the specific day against the pool type field AllowedDeferredDays (a Petit Jury pool type was used for this example):

Error window displayed after selecting a non valid day of the week:

Success displayed window prompted after selecting a valid day of the week:

Requires Admin Configuration

Release 1.0.55.0

Corrected Issues

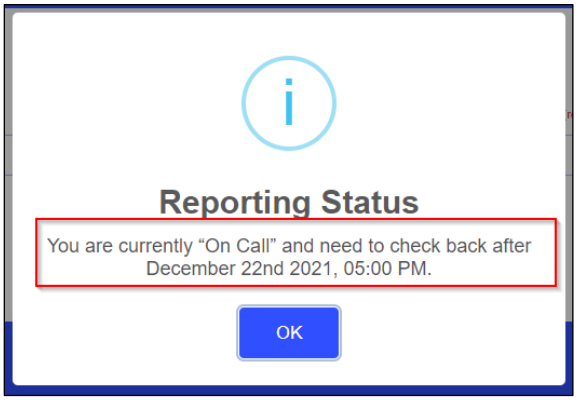

109624: The Reporting Status is Showing Required/Cancelled Prior to Set Time

Expected Result: The juror's Reporting Status for required or cancelled (called off) should show after the time set in the **WebReportingCheckNextDayTime** setting value, the day before the pool start date.

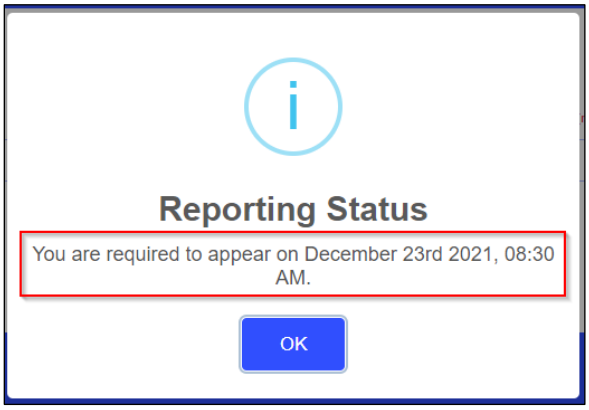

Resolution: Fixed issue where the juror's reporting status was not returning correct information. See the example below on how Reporting Status will determine the information to show after clicking the 'Get Status' button in the 'Reporting Status' tab:

- **WebReportingCheckNextDayTime** = 5:00 PM
- Pool start date = 12/23/2021
- The juror selected to check is not in a called off group, will be required to appear

Before 5:00 pm the day before the pool start date, the next message will be displayed:

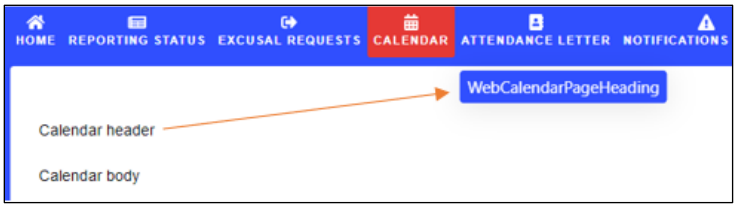

After 5:00 pm one day before the pool start date, the next message will be displayed:

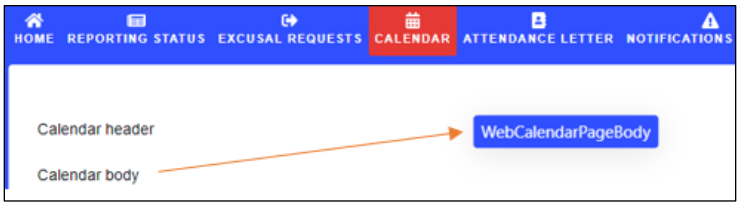

109659: Calendar Tab Header and Body Variables Update on Excusal Status Tab Instead

Expected Result: Users should see the correct tooltip setting when hovering over the header and body variables on the Calendar tab, changes made to these variables should be reflected only on this page.

Resolution: Fixed issue where calendar header, and body text were referring to Excusal Page variables. Now, the correct variables are displayed and updated in Calendar and Excusal Page screens.

Added Features

13164: Allow Jurors to Submit Excusal Documentation in JPEG/JPG /PNG/BMP Formats

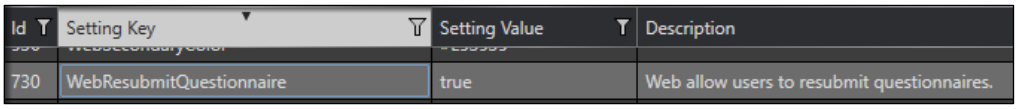

Request Details: Users would like to be able to upload different formats in the Excusal Request screen.

Resolution: Added the ability to upload JPEG/JPG/PNG/BMP files when submitting an excusal request.

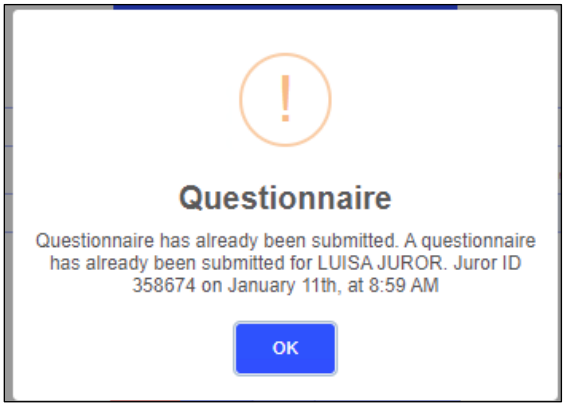

13808: Allow Jurors to Edit Questionnaire Responses and Resubmit

Request Details: Users would like to be able to edit their responses in a questionnaire previosly submitted in the Questionnarire tab.

Resolution: Added setting **WebResubmitQuestionnaire,** to allow all users to resubmit a questionnaire, the resubmit message will show as a warning. Added right **WebResubmitQuestionnaire,** to override setting **WebResubmitQuestionnaire**, resubmit message will not appear if this right is enabled in the user role.

Id	Setting Key	Setting Value	Description
730	WebResubmitQuestionnaire	true	Web allow users to resubmit questionnaires.

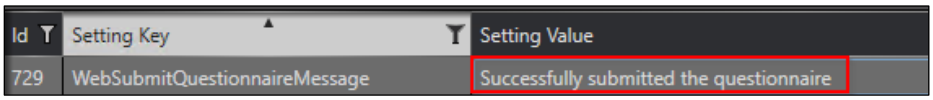

Requires Admin Configuration

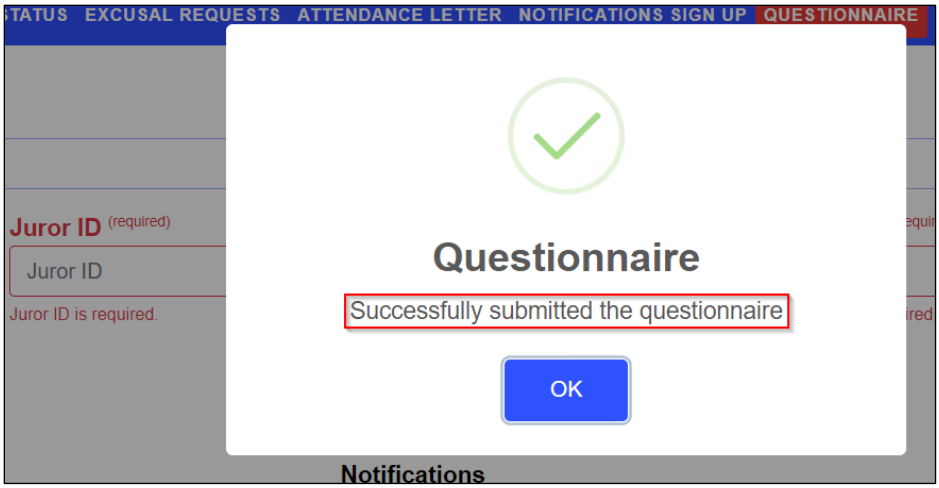

13809: Add Ability to Configure the 'Successfully Submitted Questionnaire' Message

Request Details: Users would like to be able to customize the verbiage for the successfully submitted questionnaire message prompted after the user submits a questionnaire successfully.

Resolution: Added setting **WebSubmitQuestionnaireMessage,** which value will be displayed after the user completes and submits a questionnaire successfully.

Id	Setting Key	Setting Value
729	WebSubmitQuestionnaireMessage	Successfully submitted the questionnaire

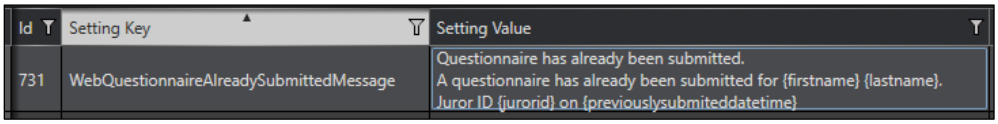

Requires Admin Configuration

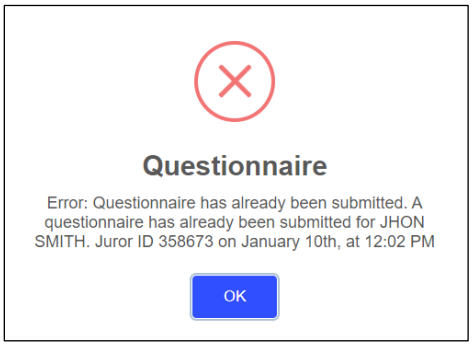

13843: Add Pop-Up to Advise of Previously Submitted Questionnaire

Request Details: If a juror puts in their info again after they have previously submitted the questionnaire, a pop-up will appear to let them know that they previously submitted the questionnaire.

Resolution: Added setting **WebQuestionnaireAlreadySubmittedMessage,** that controls the message shown when questionnaire has already been submitted.
Available replacements: {firstname}, {lastname}, {jurorid}, {previouslysubmiteddatetime}

Id	Setting Key	Setting Value
731	WebQuestionnaireAlreadySubmittedMessage	Questionnaire has already been submitted. A questionnaire has already been submitted for {firstname} {lastname}. Juror ID {jurorid} on {previouslysubmiteddatetime}

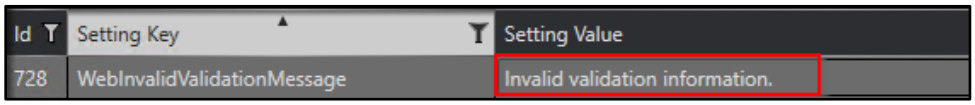

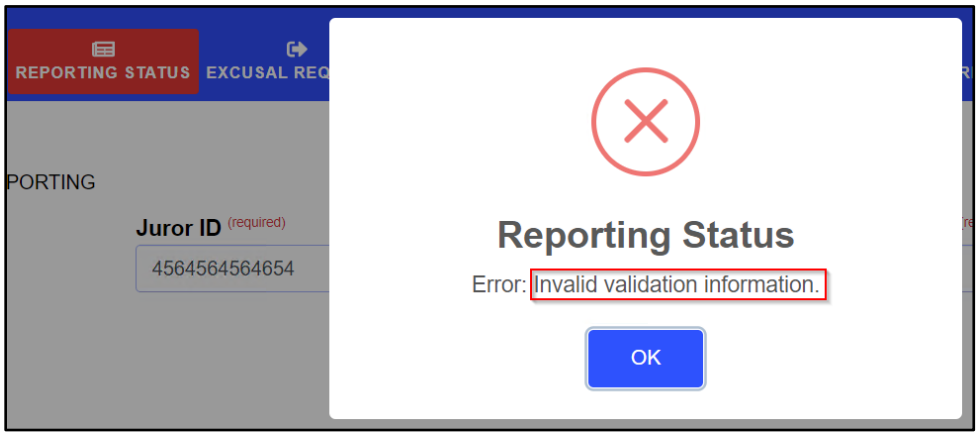

Requires Admin Configuration.

13844: Add Ability to Configure the 'Invalid Validation Information' Error Message

Request Details: Users would like to be able to customize the verbiage for the validation error message prompted when no juror is found, due to invalid entered information.

Resolution: Added setting **WebInvalidValidationMessage,** which value will be displayed for the error validation message when no juror is found due to invalid entered information.

Requires Admin Configuration.

14625: Allow Importing of TIFF Image Type

Request Details: Users would like import TIFF image type for web-summited excusal documentation.

Resolution: Added the ability to import TIFF image type for web-summited excusal documentation.

Release 1.0.52.0

Corrected Issues

109433: Capitalize ID Label for Juror ID Validation Option

Expected Result: Users would like the letter D in Juror Id capitalized for validation field label across applicable tabs.

Resolution: Changed Juror Id to Juror ID in validation screens.

109047: Misspelling Issue in the Phrase Below the Notifications Options

Expected Result: The phrase in parentheses below the notifications options should read: must have valid mobile number to select texting.

Resolution: Modified code related to the phrase in parentheses below the notifications options so it reads*:* must have valid mobile number to select texting.

Added Features

14365: Update Validation for Two-Step Counties

Request Details: Users would like that Excusal, Notifications and Questionnaire allow jurors to validate on these tabs even if they are not in a panel yet. Excusal Request should still respect the **AllowNonCheckedInJurorsOnPanel** setting, but if they are in a pool, they should be able to request an excusal.

Resolution: Added logic so validation for TwoStepSummoning will now validate by pool if no panel is found in panel validation for everything but Reporting Status.

Release 1.0.50.0

Corrected Issues

108696: Notifications Service not been Updated after Submiting an Excusal Request

> ***Expected Result:*** When juror Notify Level is 0, then submits an excusal request and smiltaneously sings up for notifications through email, text, or email and text, jurors won't get the notification chosen immediately.
>
> ***Resolution:*** Fixed issue where notification service chosen after submiting an excusal request was not updating the notification service selected immediately.

Added Features

13346: Add Setting to Keep Juror in Same PoolType

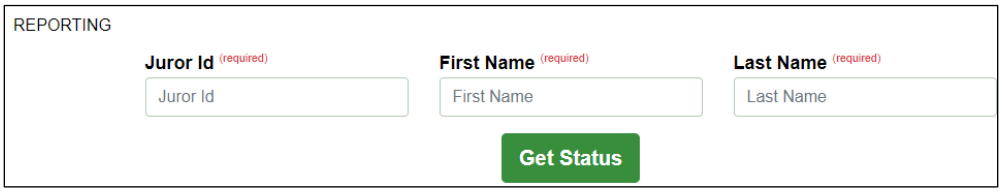

Request Details: Users would like after jurors are postponed, the jurors should stay within the same pool type for the new pool.

Resolution: Added new Setting **KeepPostponementsInSamePoolType,** when setting value is set **True**, all the jurors that reschedule are restricted to pools with the same pool type. When setting value is set to **False** no restrictions are applied when rescheduling jurors.

13464: Add Validation Option for Juror ID

Request Details: Users would like to have an option to use the juror ID as a validation field in addition to the first and last name fields.

Resolution: Added new **WebJurorValidation** option number 4 that will validate by juror ID, first and last name. This validation will work with the one step summoning option (panel or pool).

Requires Admin Configuration.

13641: Add Variables for 'Excuse Submitted' Notifications

Request Details: Users would like to include in the body of the notification email and/or in the text message, first name, last name, and juror ID when submitting and excusal request through the web.

Resolution: Added text replacements for first name, last name, and juror ID to web excusal request. Variables {firstname}, {lastname}, and {jurorid} can be included in ExcuseSubmittedMessage (text) and/or ExcuseSubmittedBody (email).

13642: Add Notification Fields to Questionnaire Tab Validation Section

Request Details: Users would like to have notification fields added to questionnaire tab validation section.

Resolution: Added notification subscription to questionnaire screen.

Release 1.0.47.0

Corrected Issues

108251: Postponed Juror Pool Placement Not Enforcing Jurisdiction

> ***Expected Result:*** Postponed jurors should not be placed in a pool outside their configured jurisdiction or district.
>
> ***Resolution:*** Fixed an issue where postponed jurors would be placed in a pool without checking for Jurisdiction or District.

Added Features

N/A

Release 1.0.46.0

Corrected Issues

107548: Hide Inactive Court Rooms on Web Calendar

> ***Expected Result:*** The courtroom drop down on the web calendar workspace should not show rooms that are marked as inactive.
>
> ***Resolution:*** Only court rooms with the active flag set to 'true' will be displayed in the drop down list on the web calendar screen.

Added Features

13034: Sanitize Juror Validation Field Input to Eliminate Spaces

Request Details: Remove leading and trailing spaces from all juror validation fields. Retain spaces in the middle.

Resolution: Removed spaces at the beginning and end or juror validation fields. Spaces between characters will be retained (example: 'Tammy Sue').

Release 1.0.45.0

Corrected Issues

107727: Jurors Incorrectly Receiving Failed To Appear Message

> ***Expected Result:*** Jurors in a pool that have been excused or have had their group called off should not receive the configured Failed To Appear message when checking Web Reporting status after the appearance date.
>
> ***Resolution:*** Fixed an issue where excused or called off jurors would see the Failed To Appear message when checking Web Reporting after the pool appearance date.

Added Features

13124: Enable External Images on SSRS Reports

Request Details: Add the ability to use external images in SSRS reports.

Resolution: Added the ability to use external images on SSRS reports.

Release 1.0.41.0

Corrected Issues

106425: Leading Zeroes in Web Fields

> ***Expected Result:*** Juror entry fields on the web should be blank before the user enters in their information.
>
> ***Resolution:*** Fixed an issue where number fields would show a 0 by default.

106761: Attendance Letter Not Found When Panel Moved

> ***Expected Result:*** Nonseated juror attendance letters should be viewable by jurors through the web if their panel date is postponed.
>
> ***Resolution:*** Fixed an issue where unseated jurors could not view their attendance letter when the panel date was moved by removing attendance validation for attendance letter retrieval. If the attendance report is blank, then the juror will receive the "Juror Has No Attendance Information" message.

Added Features

11763: Display Excuse Denial Reason

Request Details: Jurors checking on a denied excusal request should be able to see what the clerk entered as the denial reason.

Resolution: Added the ability for excusal request denial comments to be displayed to the juror when checking on a denied excusal request.

12271: Panel Juror Questionnaire

Request Details: Panel jurors should be able to fill out and submit the panel questionnaire.

Resolution: Added the ability for panel jurors to download, fill out, and submit the panel questionnaire.

12273: Alternate Questionnaire

Request Details: Users would like a way to create alternate questionnaire questions that appear under the original questions.

Resolution: Added new alternate questions that will appear in smaller text underneath the original question. These alternate questions can be controlled from the new alternate question column in the questionnaire item table.

Requires Admin Configuration.

12342: Add Ability to Control Excusal Submission Cutoff Based on Panel Start Date

Request Details: Add the ability to control excusal request submission cutoff based on the Panel Start Date.

Resolution: New setting **DaysBeforePanelDateExcuseRequestAllowed** to allow excusal requests to use the Panel Start Date. This functionality requires setting **AllowNonCheckedInJurorsOnPanel** to be true.

Requires Admin Configuration.

12343: Edit Excuse Denied Text

Request Details: Users would like the ability to modify the message jurors receive when checking the status of a denied excusal request.

Resolution: Added new Lookup WebReportingStatus – ExcuseDenied. The configured message will be displayed to users checking on a denied excusal request.

Requires Admin Configuration.

12344: Excusal Cutoff Message Customization

Request Details: Users need to be able to customize the message shown to jurors when they attempt to request an excusal past the excusal cutoff date.

Resolution: New setting **ExcusalRequestCutOffMessage** allows users to change the message jurors see when they request an excusal past the configured cutoff date.

12362: Add Ability to Pull Reporting Info from Panels for Entire Panel Time Span

Request Details: Add a configuration option for jurors to be able to call every day after a certain time to learn if they need to report the following day.

Resolution: Added new workflow for panel reporting status. New setting **PanelGraceTime** determines when to consider the reporting time over.
To use Panel reporting logic, **OneStepSummoning** must be false.
The statuses are based on the ProgramControl. Workflow follows the steps below in the order listed If criteria is not met, it will fall to the option below it.

1. Pool Juror is Excused -> **Excused**
2. Panel Juror Status is Failed To Appear -> **Failed To Appear**
3. Panel Start Date (one of the below is true) -> **Check Back Later**
    - Is not set
    - And Grace time is before Current date and time
    - Time is between Grace time and Office Close time
4. Panel End Date and Office Close time is before Current date and time -> **Passed**
5. No Panel Status is set -> **Check Back Later**
6. Panel Status is Not Required -> **Not Required To Appear**
7. Panel Status is Required To Appear
    - Panel Juror Status is No Show -> **Failed To Appear**
    - Panel Juror Status is Excused -> **Not Required To Appear**
    - Otherwise -> **Required To Appear**
8. Otherwise -> **Check Back Later**

Each message will use LookupList where:
ListName - where message is being displayed (IVR,Web, EmailSubject, EmailBody)
ListValue - options:

1. **Excused**
2. **PendingReview** - used for replacing {denied} in message

3. **CheckBack**
    1. Will use PendingReview and ExcuseDenied message to replace {pending} and {denied}
    2. Will use next appearance date to replace {appearancedate}
    3. Will use when to check for status to replace {aftertime}
4. **NotRequired**
5. **RequiredToAppear**
    1. Will use PendingReview and ExcuseDenied message to replace {pending} and {denied}
    2. Will use next appearance date to replace {appearancedate}
6. **FailedToAppear**
7. **ExcuseDenied** - used for replacing {denied} in message
8. **Passed**

Requires Admin Configuration.

12864: Do Not Throw History Records for Notifications when Notifications are Off

Request Details: When the setting **NotifyJurorExcusalStatus** is false, do not add history records to jurors for emails and texts that would have been sent if the setting was true.

Resolution: When **NotifyJurorExcusalStatus** is false, history records for notifications will not be added to the juror history. This would occur when a juror requests an excusal and when it is approved or denied.

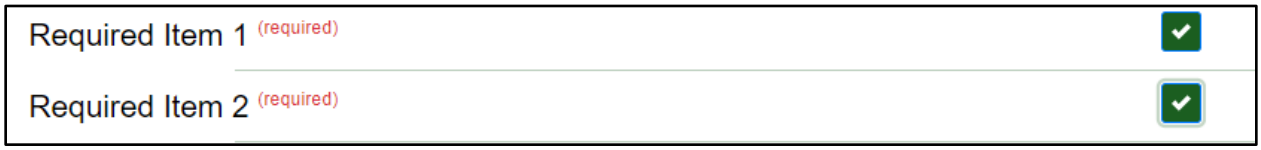

Release 1.0.38.0

Corrected Issues

106806: Multiple Required Items

Expected Result: Questionnaires with more than one required items should not throw an error.

Resolution: Users are now able to submit questionnaires with more than one required item on the web without error.

Added Features

12265: Questionnaire Returned Field

Request Details: Users would like a way to track when questionnaires have been returned.

Resolution: Added new QuestionnaireReturned column to the pool juror table. When a juror submits a questionnaire on the web, this column will automatically be updated.

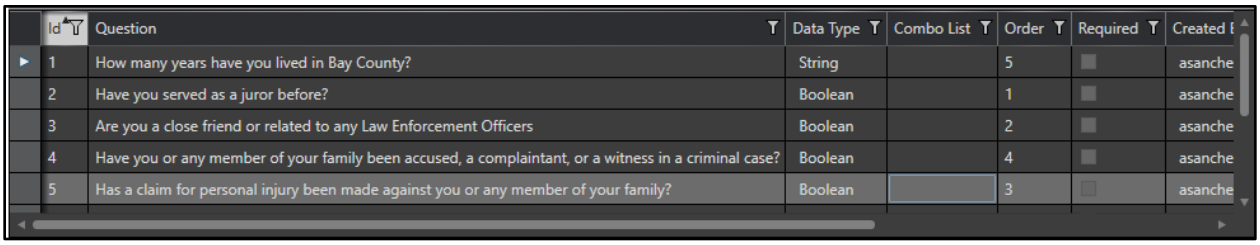

Release 10.37.0

Corrected Issues

106767: Questionnaire Order

Expected Result: Questionnaire questions should appear in the order set on the questionnaire admin menu.

Resolution: Fixed issue where questionnaire questions were appeaing in order of ID rather than the order set. Now, questionnaire questions will appear based on the order set in the questionnaire admin menu.

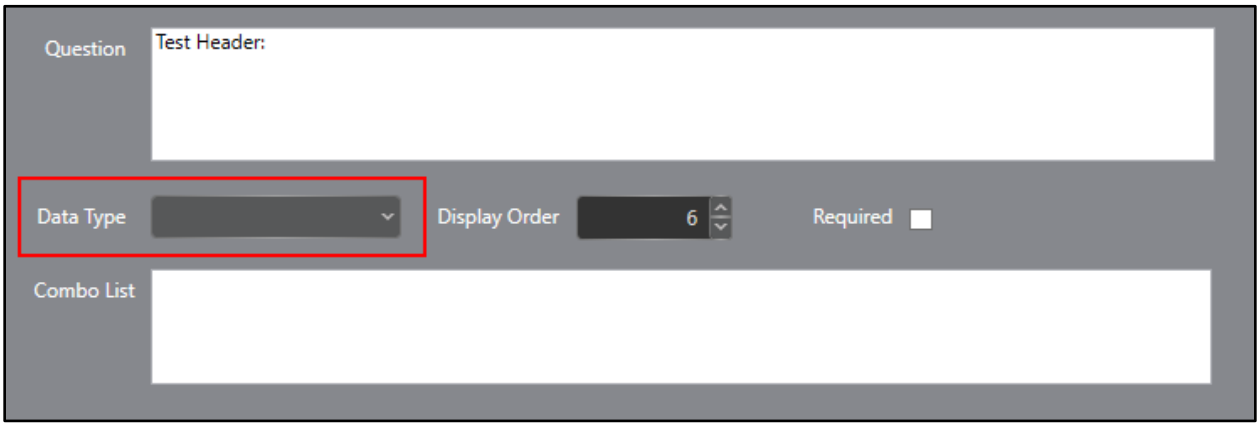

Id	Question	Data Type	Combo List	Order	Required	Created
1	How many years have you lived in Bay County?	String		5		asanche
2	Have you served as a juror before?	Boolean		1		asanche
3	Are you a close friend or related to any Law Enforcement Officers	Boolean		2		asanche
4	Have you or any member of your family been accused, a complaintant, or a witness in a criminal case?	Boolean		4		asanche
5	Has a claim for personal injury been made against you or any member of your family?	Boolean		3		asanche

106768: Questionnaire Header

Expected Result: Headers should appear in the questionnaire without a place to enter data.

Resolution: Fixed issue where headers were appearing in the questionnaire with a combo box. Now, items that are submitted to the questionnaire with no data type will appear without a combo box

Added Features

Release 1.0.34.0

Corrected Issues

106714: Update Jury Web Libraries

> ***Expected Result:*** Update the Jury Web libraries to the latest versions to fix possible vulnerabilities.
>
> ***Resolution:*** Updated the javascript libraries and fixed and issue with the calendar on IE.

106766: Excusal Request not Marking Pool Juror as Excused

> ***Expected Result:*** Postponement requests submitted from jurors on a pool without start and end dates should still be logged.
>
> ***Resolution:*** Fixed issue where postponement requests were not marking pool juror as excused because of PoolStartDate and PoolEndDate not being set.

Added Features

10442: SSRS Reports

Request Details: Users would like the ability to generate SSRS reports on the web.

Resolution: Added new program controls that will allow SSRS reports to be generated on the web.

Release 1.0.31.0

Corrected Issues

104258: Permanent Excusal Request Option

Expected Result: Users would like to be able to select which excusal request types can be selected by jurors as a permanent excusal request.

Resolution: Added “Show Perm” checkbox to Admin -> Juror Statuses. When checked, jurors requesting an excusal for that excuse type will be able to select whether they want the excusal to be permanent.

Requires Admin Configuration.

106598: Driver’s License Lookup SQL Injection

Expected Result: Users should not be able to inject SQL queries through juror lookups on Jury Web.

Resolution: Fixed an issue where the Driver’s License lookup allowed for injection of SQL queries.

Added Features

11527: Allow Web Contact Info to Write to Database

Expected Result: Contact information should be added to the web questionnaire. Information collected should replace existing information if it is different from what was entered by the juror on the web. Also collect the history of changes from the web updates.

Resolution: Added setting **WebQuestionnairePhoneNumberAddress** to control showing the phone number and address inputs on the questionnaire. Added the state drop down. Added a history record to track adress changes.

12008: Edit "I swear or affirm" Text

Expected Result: Add the ability to customize the "I swear or affirm…" verbiage that jurors check when filling out an excusal request.

Resolution: Added setting **WebExcuseSwearLabel** to change the text displayed in the "I swear or affirm..." check box text that displays before a juror fills out excuse information.

Requires Admin Configuration.

Release 1.0.30.0

Corrected Issues

104273: Extra Info Excusal Requests

> ***Expected Result:*** Excusal request reasons that are not marked as requiring extra information in-client should not prompt the user for more info.
>
> ***Resolution:*** Fixed an issue where excusal request reasons not marked as requiring extra info would not be submitted without extra info.

104950: Web Admin Rights

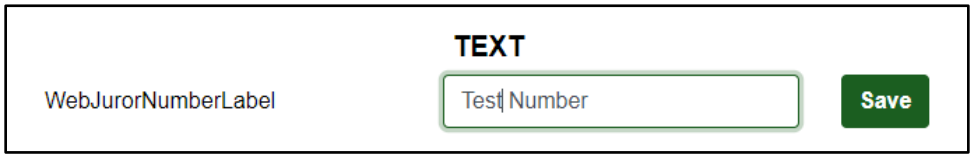

> ***Expected Result:*** Users with the **WebCalendar** or **WebSubmittedQuestionnaire** rights should not have access to **WebAdmin**-exclusive functions.
>
> ***Resolution:*** Fixed an issue where users with the **WebCalendar** or **WebSubmittedQuestionnaire** rights were erroneously given **WebAdmin** rights.

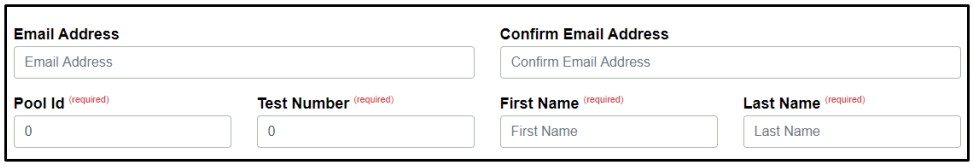

Added Features

11520: Juror/Badge Number

Request Details: Users would like to change the Juror Number label on the web.

Resolution: Users will now be able to configure the juror number label to read anything. Added new setting **WebJurorNumberLabel.** The value of this setting will appear anywhere juror number appears on the web.

Requires Admin Configuration.

11757: Questionnaire After Appearance

Request Details: Users would like to be able to submit questionnaires even after the appearance date/time has passed.

Resolution: Jurors will now be able to submit questionnaires after the appearance date without receiving an error. Added new setting **WebSkipQuestionnaireAppearanceValidation.** When true, users will be able to submit questionnaires after the appearance date/time has passed. When false, users that attempt to submit a questionnaire after the appearance date/time will receive an error.

Requires Admin Configuration.

Release 1.0.27.0

Corrected Issues

104111: Excusal Confirmation Email

Expected Result: When an excusal request is submitted on the web, the juror submitting the request should receive a confirmation email.

Resolution: Updated logic so users will now receive an confirmation notification, either text or email depending on what the user selects, when the excusal request was received.

Added Features

10806: View Submitted Questionnaire

Request Details: Users would like the ability to view submitted questionnaires from the web.

Resolution: Users are now able to view submitted questionnaires from the web. Users with the new right **WebSubmittedQuestionnaire** enabled will be able to view submitted questionnaires on the web.

Requires Admin Configuration.

Release 1.0.24.0

Corrected Issues

20599: Event Date Picker Appears to Remain Open in the Background-Event Date Auto Changing

Expected Result: When creating a new event and when editing each field, the date should not automatically change when editing different fields in Internet Explorer.

Resolution: Issue where when adding an event and the date would change automatically in Internet Explorer has been fixed.

20638: Jury Web Hide Login

Expected Result: Ability to hide login on web.

Resolution: Added new option to Connection file **HideWebLogin**, if set to true the login will no longer show.

20664: Logging in Shows Admin Access Information Even if the Right is Not Set

Expected Result: Admin Access should only be available if the logged in user has the Right.

Resolution: Logging in now shows and hides admin access correctly.

21218: Removing the Feedback Tab Causes Internal Website to Crash

Expected Result: Removing the feedback tab from **WebHomeButtonText** does not throw an error.

Resolution: Fixed an issue where clearing out the feedback tab would cause an error where the website would not load.

103946: Updating Juror Phone Numbers and Email

Expected Result: When a juror updates their phone number and email for notifications, those changes should be reflected in the client.

Resolution: Fixed an issue that was preventing the email address field in the client from being updated if the field was already populated. Now, the client will display the new information that is entered on the web.

103947: Postponement Request Message

Expected Result: When a juror is submitting a postponement request from the web, the notification upon completion should have the correct wording.

Resolution: Updated the notification on the Excusal Request page to just read 'Request' rather than 'Excusal Request.' This change was made because not all the requests on that page were for excuses. The Juror may be requesting disqualification or postponement instead.

Added Features

9628: Questionnaire Page

Request Details: Users would like a configurable questionnaire page where they will be able to answer questions and submit it before their summon date. A captcha should be required on every tab that requires jurors to enter their credentials.

Resolution: Added questionnaire page with configurable heading and body. New tables have been added. Added recaptcha to questionnaire page. The Questionnaire Page is controlled by new settings**, WebQuestionnairePageHeading, WebQuestionnairePageBody, WebQuestionnaireQuestionsHeading** and **WebQuestionnaireQuestionsBody**. Added recaptcha to questionnaire page, using settings **RecaptchaRequired, RecaptchaSecretKey,** and **RecaptchaSiteKey.**

Requires Admin Configuration.

9874: Home Page

Request Details: Users would like a configurable home page

Resolution: Added home page with configurable heading and body. Controlled by new settings **WebHomePageHeading** and **WebHomePageBody.**

Requires Admin Configuration.

9875: Reporting Page

Request Details: Users would like a configurable reporting page

Resolution: Added a configurable reporting page.

Requires Admin Configuration.

9876: Excusal Page

Request Details: Users would like a page to process excusals on the web

Resolution: Added a new excusal page to process juror excusals. A Recaptcha has been added as well using settings **ReCatchaRequired, RecaptchaSecretKey**, and **RecaptchaSiteKey.**

9877: Subscription Page

Request Details: Users would like a configurable subscription page. A captcha should be required on every tab that requires jurors to enter their credentials.

Resolution: Added a configurable subscription page. Added recaptcha to subscription page.

 **Requires Admin Configuration.**

9878: Feedback Page

Request Details: Users would like a page to submit feedback.

Resolution: Added a configurable Feedback page. The page is controlled by new settings **WebFeedbackPageHeading** and **WebFeedbackPageBody**.

 **Requires Admin Configuration.**

9879: FAQ Page

Request Details: Users would like a page to view answers to frequently asked questions.

Resolution: Added an FAQ page to Jury Web. When logged in as an Admin, the user is given the option to directly edit the questions and answers on the FAQ page.

 **Requires Admin Configuration.**

9919: Print Verification Letter Page

Request Details: Users would like to provide the ability for jurors to print out verification letter of jury attendance. A captcha should be required on every tab that requires jurors to enter their credentials.

Resolution: Added a Attendance Letter page where jurors will be able to print out verification letter when entering their Pool ID, Juror Number, First and Last Name. Added recaptcha to verification letter page. When logged in as admin the user will be able to edit the Heading and Body of the Attendace page with the settings, **WebAttendancePageHeading** and **WebAttendance PageBody.** Added recaptcha to verification letter page, using settings **RecaptchaRequired, RecaptchaSecretKey,** and **RecaptchaSiteKey**.

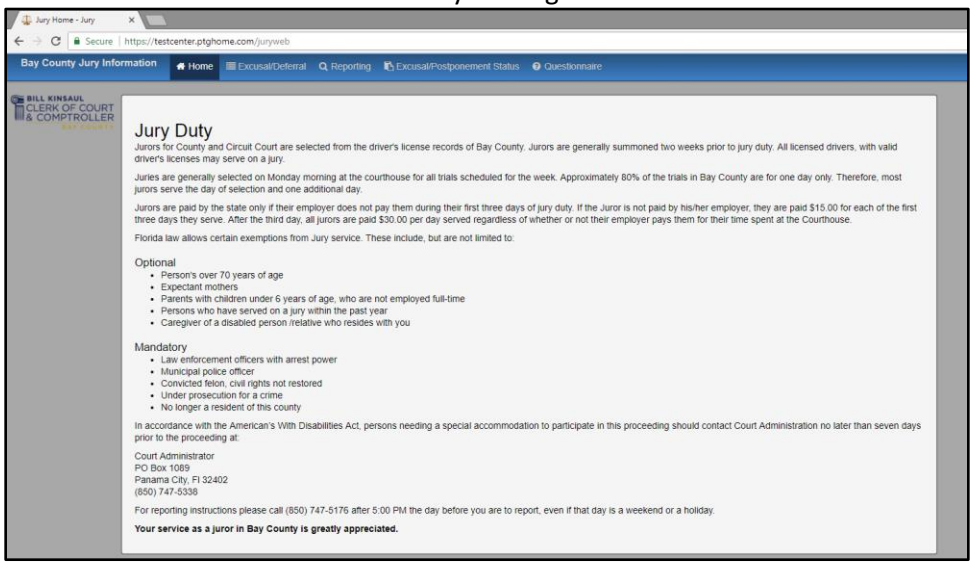

Requires Admin Configuration.

10057: Jury Old Web Redesign

Expected Result: The old website is to be redesigned.

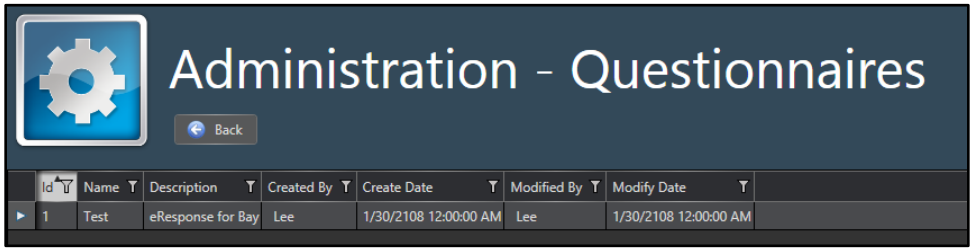

Resolution: Users will now see a newly redesigned web.

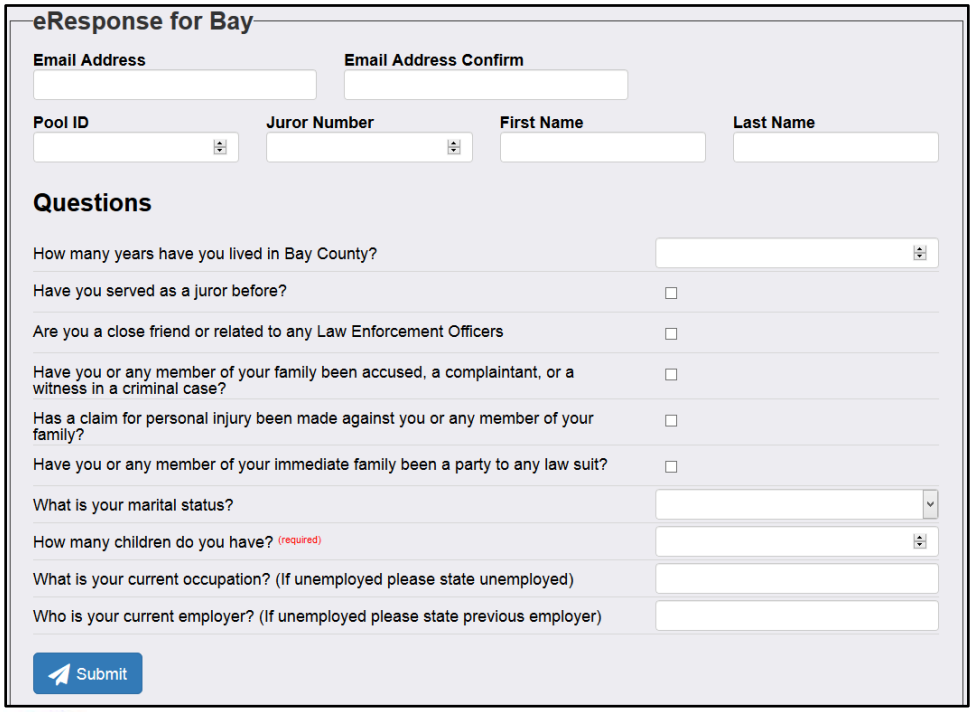

10058: Jury Questionnaire

Expected Result: Add a new questionnaire to the web

Resolution: Users will now see a configurable questionnaire page on the web. This page is controlled by the new questionnaire table which allows users to set the questions on the questionnaire page on the web

Requires Admin Configuration.

10062: Web Classic Changes

Expected Result: Multiple requests:

- Remove date range from excusal status message
- Create new page to check excusal postponement status
- Correct issue with questionnaire showing negative numbers
- Adjust verbiage on section “B” for reporting
- Add a notification for required fields when left blank
- Report to show questionnaire results

Resolution: Fixed issue with logo resizing. Removed the date range from the excusal status message. Created a new section to check excusal postponement status. Corrected the negative numbers on the questionnaire. Added a notification for required fields when left blank.

10267: Add Calendar Picker in Postponement Request Section- Excusals Page

Expected Result: Court requested to add a calendar picker for jurors to pick an eligible date they want to postpone their service to.

Resolution: Added a date picker for JurorStatus that have a Reschedule of True.

10268: Add Logic to Postponement Request Section – Excusals Page

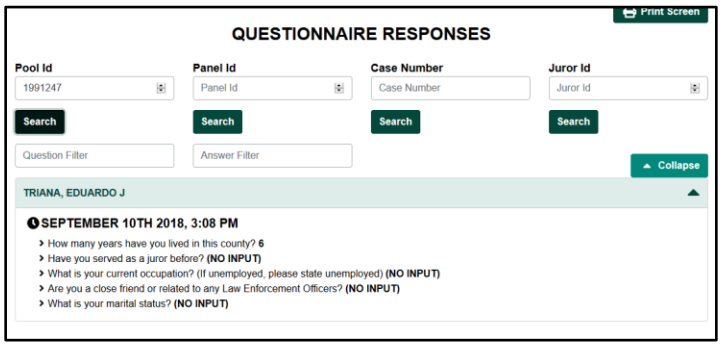

Request Details: Add same logic used for postponements within the client to manage postponements that are requested on the web.

Resolution: Added logic from IVR and Client to postponement date selection.

10269: View Completed Questionnaires

Request Details: Judges would like a way to view completed juror questionnaires on the web.

Resolution: Added new View Completed Questionnaire section to the Questionnaire screen. Judges are now able to search for questionnaires by Pool ID, Panel ID, Case Number, and Juror ID.

10270: Change Symbol on Confirmation Window to Correspond with the Action

Request Details: Excusal Request Status should show a Check symbol when excusal is granted. Excusal Status should show a Caution symbol when a request has been submitted but not yet approved.

Resolution: Changed what symbol shows for Excusal Request and Excusal Status.

10281: Add Font Requested by PBCC

Expected Result: When editing web, users would the the Lato font added.

Resolution: The Lato font and other default fonts have been added to web to edit.

10282: Add Colors Requested by PBCC

Expected Result: Users would like the free form field to have a specific color.

Resolution: When editing web, users will be able to choose from an array of colors for the website.

10319: Jury Calendar

Expected Result: Add a new calendar tab to the web.

Resolution: Customizable calendar page has been added to web. Settings **WebCalendarButtonTest**, **WebCalendarPageBody**, and **WebCalendarPageHeading** allow user to cutomize the page.

Requires Admin Configuration.

10396: Users in Judge Users Should Be Allowed to Edit Calendar but All Users With Calendar Access Should Be Able to View Calendar of All Active Judges

Request Details: Users in judge users should be allowed to edit calendar but all users with calendar access should be able to view calendar of all active judges.

Resolution: Only users in judge users will be able to edit judge calendar events. Everyone with calendar access will be able to view all active judges calendar.

10398: Hide Jurors Supplied in Calendar

Request Details: Juror supplied should be hidden in calendar when adding or editing a new event.
Resolution: Jurors supplied now hidden when adding or editing an event.

10400: Set Case Number Field to Required on the Calendar

Request Details: When adding an event to the calendar on Jury Web, the case number field needs to be ignored.

Resolution: Made case Number required.

10401: Default Web Settings

Request Details: Users would like default setting values for web settings.

Resolution: Web Settings will now default to the DBUpdate. If a setting value does not exist, it will be set to the corresponding Default Value.

Requires Admin Configuration.

10458: Ability to Hide Tabs on the Web

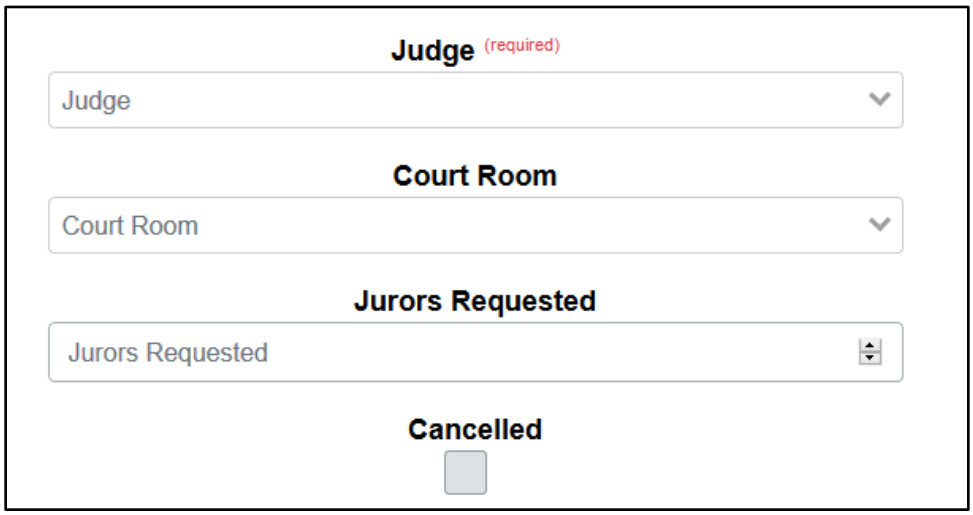

Expected Result: Users would like the ability to hide certain tabs from the web.

Resolution: Added the ability to hide tabs on the web if the tab name is blank, it will be hidden.

10531: Cancelled Check Box

Expected Result: Users would like better visibility of the cancelled box

Resolution: The cancelled box on the new events screen will now be more visible on all browers.

10562: Internal and External Emails

Request Details: Users would like a way to have separate email address for internal and external emails.

Resolution: When feedback emails are sent, they will be sent from a NoReply email address to be configured by the user. When Case Events are changed and an email is triggered, this email will be sent from the email of the user making the change. For this to work as expected, the mail server must be set up to allow relaying mail through the server that hosts the windows service.

The setting **SendEmailsUsingService** must be equal to true.

The NoReply email can be configured with SMTP settings from **Admin > Settings.** The value for **SMTPFromAddress** will be used to send send emails.

SMTPEnableSsl	true
SMTPFromAddress	PTGRelay@ptghome.com
SMTPFromName	County Jury EMail
SMTPPassword	281Pioneer!
SMTPPort	587
SMTPServer	smtp.office365.com
SMTPUser	PTGRelay@ptghome.com

To have an email sent from an internal address, the user must have an email account linked to their login. Then the user must be added to as Judge User from **Admin > Judges > Edit Judge User.** If the user is not set as a judge user, they will not be able to edit case events. If the user does not have an email address, the email will be sent from the **SMTPFromAddress.**

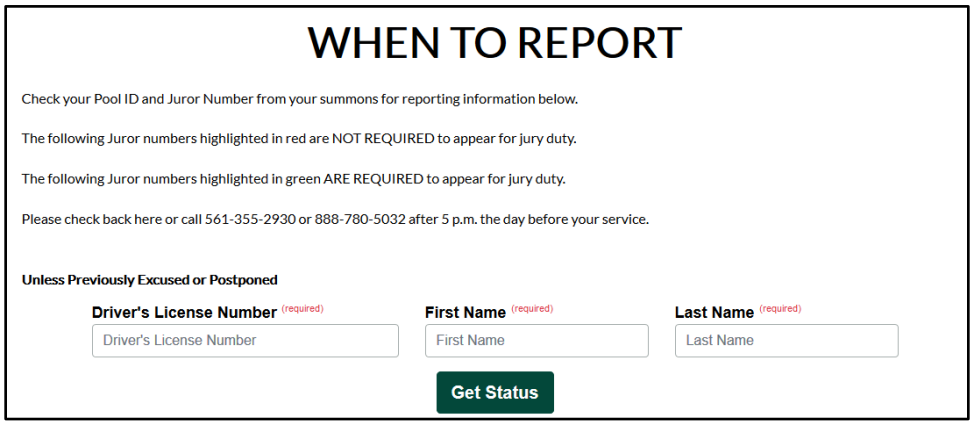

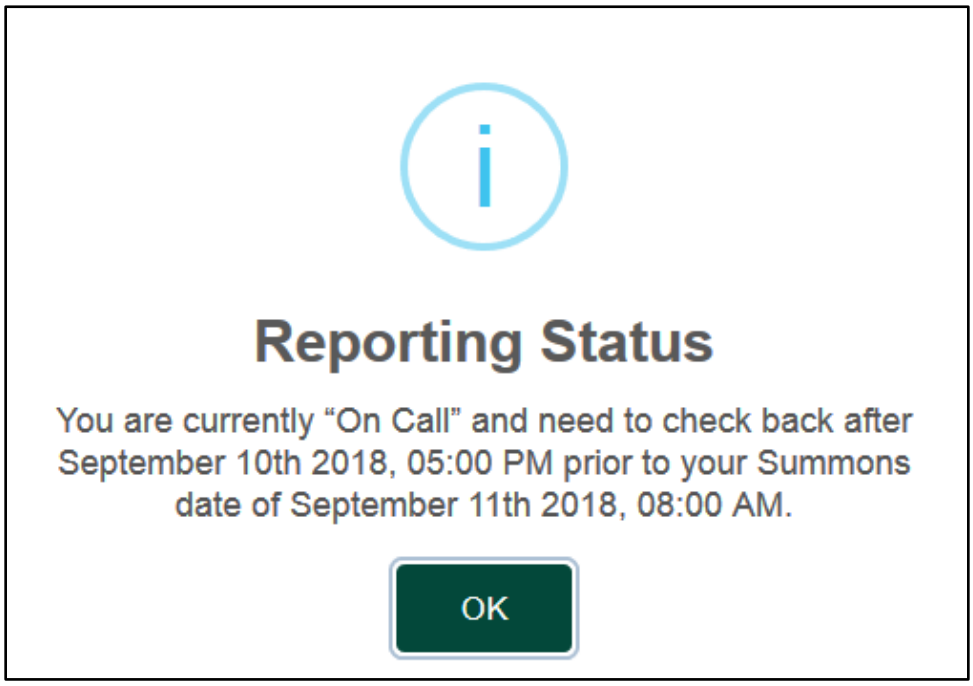

Requires Admin Configuration.

10568: Web Reporting Page

Request Details: Users would like a new How to Report page

Resolution: The new When to Report page now features a look up and pop up that shows the reporting status for Jurors.

10578: Add Option to Require an Attachment When Submitting a Web Excusal Request

Request Details: Add option to require an attachment when submitting a web excusal request.

Resolution: New field on JurorStatus WebRequireDocument to require an attachment for selection.

10579: Web Excusal Request Documentation

Request Details: Users would like to require an attachment when submitting a new excusal request.

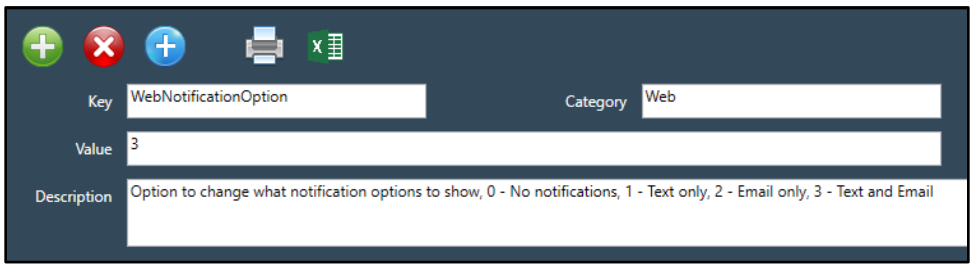

Resolution: Excusal documentation will now be required for juror excusals.

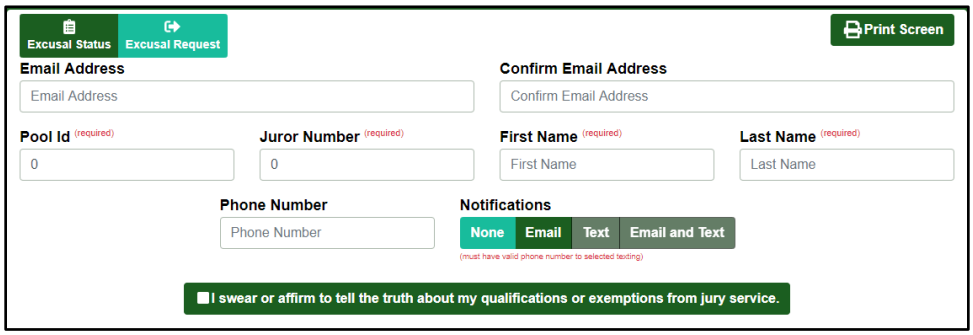

10580: Ability to Change Which Notification Fields Are Shown

Request Details: Add a setting which will allow court to turn the sign-up for notifications on and off.

Resolution: Added new setting **WebNotificationOption** to control notification options. Under **Admin > Settings**.

0 = no notifications; 1 = text only; 2 = e-mail only; 3 = text and e-mail

Requires Admin Configuration.

10582: Formatting Feedback and JA calendar Emails

Request Details: Update the formatting on the feedback emails and add a generic subject line.

Resolution: Fixed formatting of feedback email and calendar emails to send to logged in user and made calendar emails send from logged in user.

10619: Add Ability to Select Display Order for Web Tabs

Request Details: Ability to select display order for all web tabs and sub-tabs.

Resolution: Option to reorder tabs, will now append the order to the front of the setting.

10623: Added Setting to Handle Deferral Requests on Web

Request Details: Add a setting to web that places juror in excuse queue or automatically defers the juror when requesting a deferral.

Resolution: Web will now use the existing **AutoMoveRescheduleJurorsWhenPoolExists** setting to handle juror deferrals.

Admin > Settings

When set to true, deferred juror will automatically be moved to a pool on the postponement date. When set to false, juror postponement date will be set without assigning a pool automatically.

Requires Admin Configuration.

10938: Removed Old Logic for Replacing Excusal Verbiage

Request Details: Remove the old web logic for replacing excusal verbiage unnecessarily.

Resolution: Removed old logic that changes juror statuses on the web.

10998: Allow Ability to Select Calendar and Required Extra Info

Request Details: Allow web excusal request to display both the calendar and the free text field at the same time.

Resolution: Added ability to have both reschedule calendar and extra info for excusal requests. Using the reschedule option will also save the note now.

11018: Added Field Limitations for Tab Order Field

Request Details: Add limitations to what characters are allowed in the tab order fields.

Resolution: Tab order text box will now only allow numbers. Deleting tab order text sets it to 0; deleting the tab name text makes it hidden.

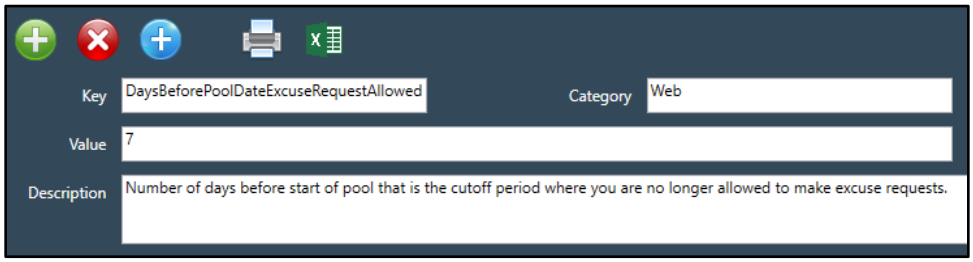

Requires Admin Configuration.

11083: Reactivate Logic for **DaysBeforePoolDateExcuseRequestedAllowed** Setting

Request Details: Add the ability to allow jurors to reschedule as long as they are within a certain amount of days from the jury date.

Resolution: Added the use of **DaysBeforePoolDateExcuseRequestedAllowed** setting. Excusal requests can only be made before the setting's number of days of the pool start date.

Example: jurors can make excusal requests up to 7 days (1 week) before the pool start date.

Requires Admin Configuration.

Release 1.0.0.5

Corrected Issues

19575: Unable to Attach A Document to an Excusal Request

Expected Result: Able to attach a document to an Excusal Request.

Resolution: Logic in StoreDocumentImagesInBlob was modified and notes were changed.

19602: Restrict Attachments to PDF in Excusal Request

Expected Result: Restrict attachments to PDF when making excusal request.

Resolution: Change settings **RestrictExcusalDocumentsToPdfFormat** and **AttachDocumentationInTheFormOfText**. Setting **RestrictExcusalDocumentsToPdfFormat** to true, it will only accept PDF documents and not TIF. **AttachDocumentationInTheFormOfText** setting modifies the title.

Requires Admin Configuration.

Added Features

9545: Setting to Prompt to Employer Paid when Checking in Jurors

Expected Result: Typing the letter Y or N rather than clicking Yes or No when prompted with employer paid question.

Resolution: You can now press Y for Yes and N for No.

9627: Require Juror Email Before Any Action Can Be Taken

Expected Result: Juror should not be able to complete any action until they enter an email address.

Resolution: Juror cannot submit an excusal request form or get the status of their excusal request until they enter an email.

9632: Layout Issues with Directions Map

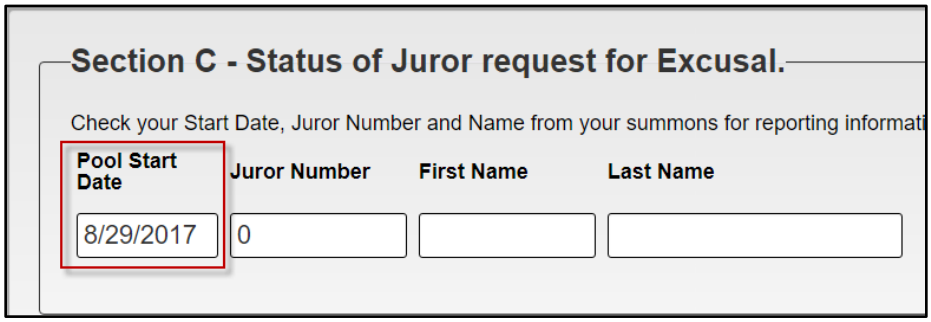

Expected Result: When there are more directions than the initial page size can contain, it will no longer go off the page.

Resolution: Corrected in code that prevents the directions from going off the page.

9653: Ability to Use Pool Start Date Instead of Pool ID

Expected Result: Perform Status of Juror Request search with Pool Start Date instead of Pool ID.

Resolution: Added ability to check Status of Juror using Pool Start Date instead of Pool ID.

9776: Status Screen for Non-Sequential Jurors within Groups

Expected Result: Present an alternative section B.

Resolution: When setting **WebJurorNumbersSequentialWithinGroup** if false, present an alternative section B.

Requires Admin Configuration.
