Database Schema Changes

Landmark software updates often include changes to the database schema to facilitate new fields and other added features. These schema changes are automatically applied during the first launch of the new version after updating. Any changes are always backwards compatible. Older versions will still run properly when connecting to a database that has been updated to a newer schema.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

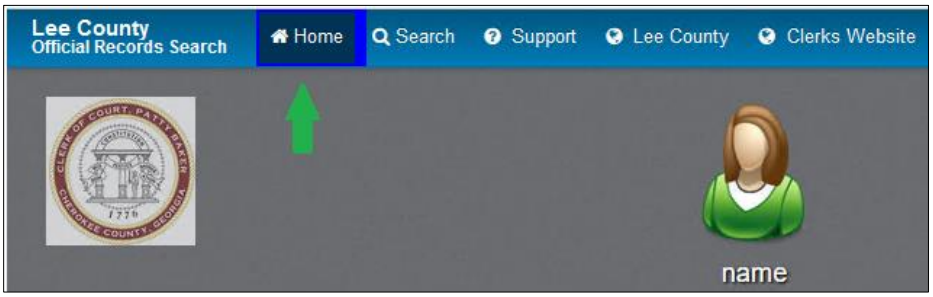

Release 1.5 Service Pack 103

Corrected Issues

LAN-1325: Focus Indicator is not Visible When Using Firefox

Expected Result: The focus indicator in the Firefox web browser should clearly show the user's keyboard focus location.

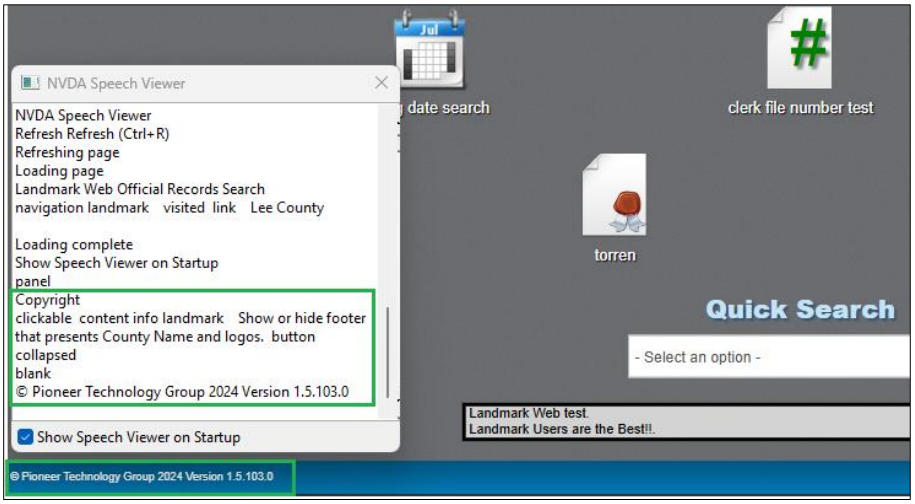

Resolution: Fixed issue where the focus indicator in the Firefox web browser was not showing the user's keyboard focus. Now, after tabbing through the site, the focus indicator correctly highlights the selected option.

LAN-1327: Expand/Collapse State of The Element is Missing or Incorrect

Expected Result: The screen reader should announce the content after users press the button to expand the footer.

Resolution: Fixed issue where the screen reader remained silent after pressing the button to expand the footer content. Now the screen reader correctly announces the information related to the expanded footer content, in addition, ">>" was replaced with "Copyright >>", once the footer is displayed the copyright splitter is hidden.

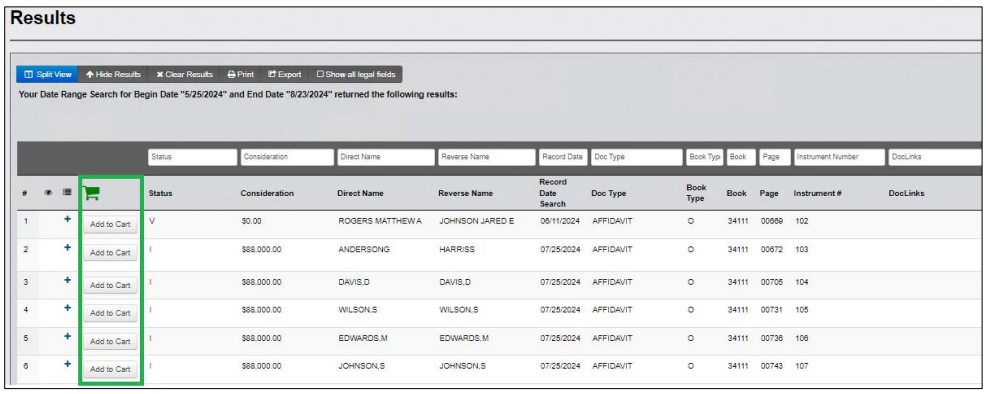

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

LAN-1358: Misalignment of Web Results

Expected Result: Search results should be properly displayed when TrieDataOnTheWebActive is set to true.

Resolution: Fixed issue where web results data was misaligned to the incorrect column/field. Add to Cart column header is now properly displayed, data columns are aligned in the grid and in the Export and Print results.

Date Range Search for Begin Date "5/25/2024" and End Date "8/23/2024" | Total Records "200" | Verified Through Date "02/06/2023 (20230041645)."

LAN-1523: Palm Beach – Trie Data Shopping Cart should Always be Visible

Expected Result: Add to Cart button and Shopping Cart menu option should be visible if ShowTrieDataShoppingCart is set to true, this should not require the customer to be a registered user. This will be handled through the shopping cart.

Resolution: Fixed issue where the Add to Cart button was not displayed if the user was not logged in. The button and menu option are now visible to the user without a logged in account.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

LAN-1251: Fixed Watermark Issue on E-Recorded Web Images

Request Details: Add the ability for Web_Users to retrieve an unwatermarked copy of their eRecord documents.

Resolution: Added the ability for users to retrieve unwatermarked copies of their eRecorded documents, a new right was created WebViewSameAgentDocuments. Web_User role must have this right added to see unwatermarked documents. **Note:** If the Web_User is configured as a subscriber, then the system user Web_Subscriber must have the right assigned as opposed to the Web_User, if they are not a subscriber.

LAN-1503: Disable The TLS Code in Landmark Web

Request Details: TLS protocol needs to be updated to prevent errors when users disable TLS 1.10 and 1.1.

Resolution: All references to all versions of TLS have been removed.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 100

Corrected Issues

LAN-1107: Search by Plat Name Reservations with Enter Key

Expected Result: Search results should be displayed when the user hits the Enter key after filling the Name field during a Plat Name Reservation search.

Resolution: Fixed issue where a Plat Name Reservation search was not performed when the user pressed the Enter key in the Name field, now Plat Name Reservation search is performed when the user hits the Enter key or presses the Submit button.

LAN-1290: Accessible Name/Label to Close Button on Disclaimer and FAQ Dialogs for Screen Reader Clarity

Expected Result: In the Disclaimer and FAQ dialogs the Close button should be labeled in the screen reader announces.

Resolution: Fixed issue where on the Disclaimer and FAQ dialogs the Close button was not labeled in the screen reader announces.

Notice:

Accessibility code changes require counties to manually update existing Web.config files. A new file is included in the release folder called: Changes to the webconfig for Version 1.5.94 and higher.txt.

Add the following inside the section: <runtime> <assemblyBinding>

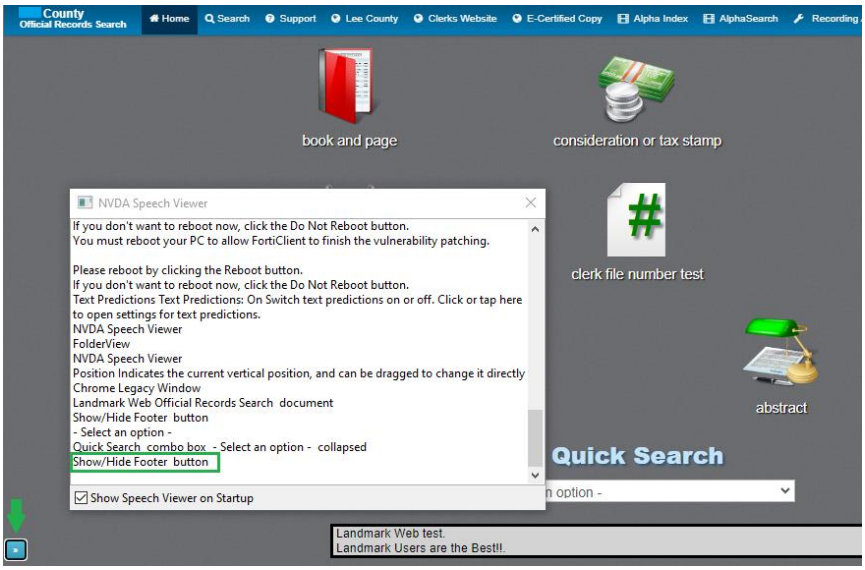

```
<dependentAssembly>
        <assemblyIdentity name="WebGrease" publicKeyToken="31bf3856ad364e35" culture="neutral" />
        <bindingRedirect oldVersion="0.0.0.0-1.3.0.0" newVersion="1.3.0.0" />
</dependentAssembly>
<dependentAssembly>
        <assemblyIdentity name="System.Data.Common" publicKeyToken="b03f5f7f11d50a3a" culture="neutral" />
        <bindingRedirect oldVersion="0.0.0.0-4.1.0.0" newVersion="4.1.0.0" />
</dependentAssembly>
```

LAN-1292: Label Expandable Footer Button for Screen Reader Users

Expected Result: In the Home page when the footer button is selected, the action should be announced by the screen reader.

Resolution: Fixed issue where the action in the footer button was not announced by the screen reader, now after selecting the button the screen reader announces the content information Show/Hide Footer button.

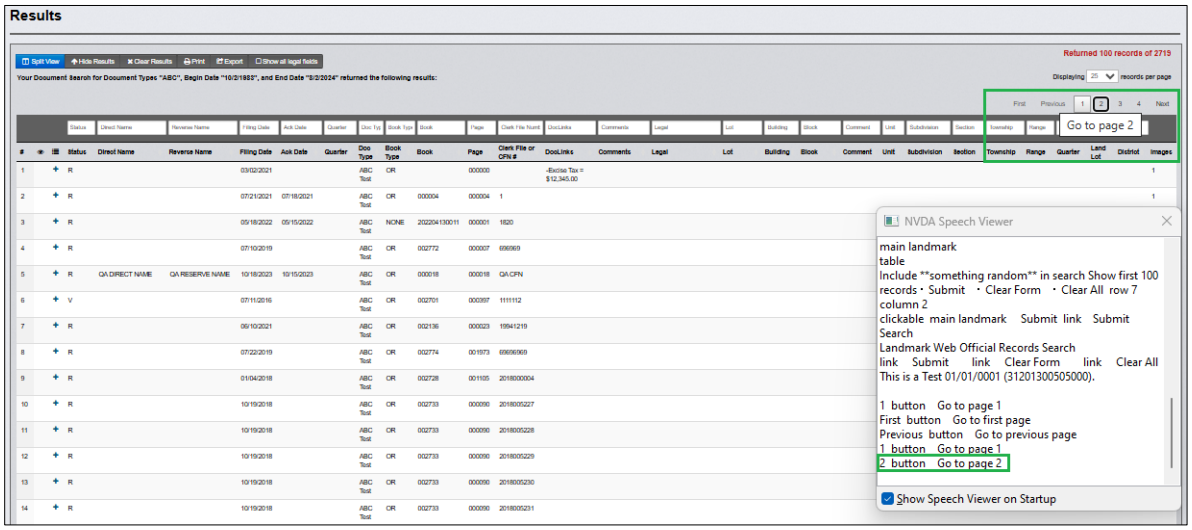

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

LAN-1293: Add Accessibility Label to Pagination Buttons

Expected Result: In the Search Results table, a reader should be able to read Pagination buttons as “Go to Page #” where # is the corresponding number (one, two, three…) selected by the user.

Resolution: Fixed issue where pagination options displayed on Search Results table were not labeled and captured by screen readers. Now pagination options have corresponding labeling to convey visual information to screen reader users providing information programmatically or in text.

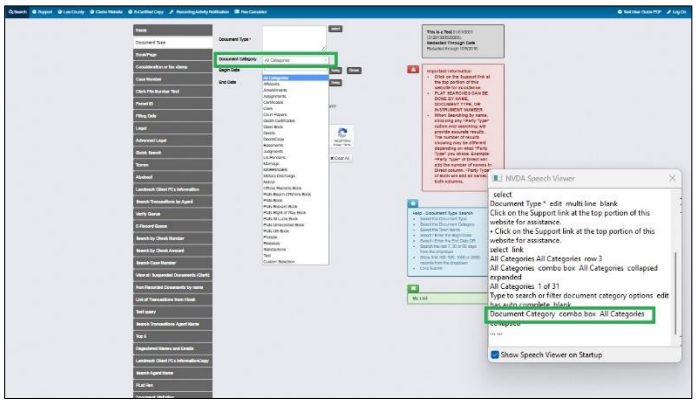

LAN-1298: Implement Accessible Label for Document Category Field's Search Edit Box

Expected Result: The search combo box list for the Document Category field should be labeled in all instances, particularly within each vertical tab that delineates the different search categories.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

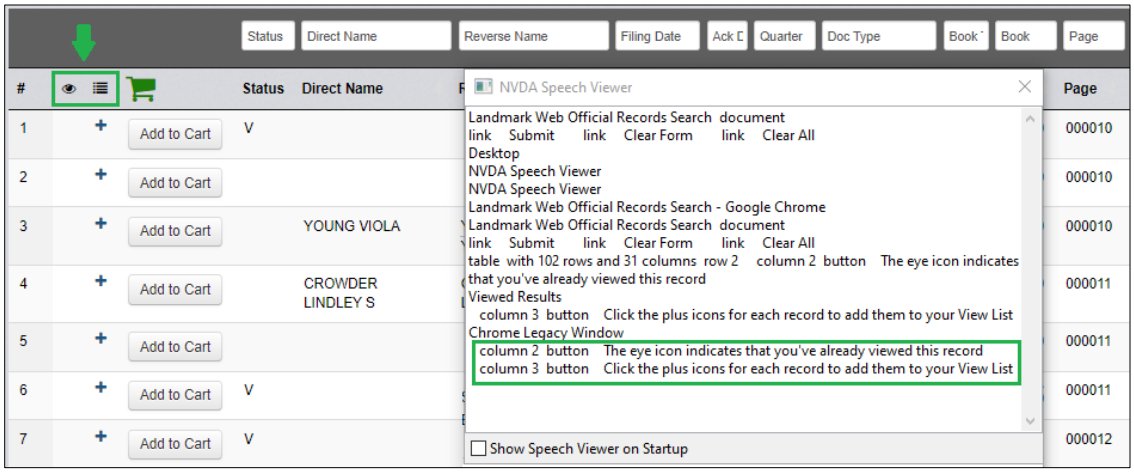

Resolution: Fixed the issue where the search combo box list was not labeled. Now, after clicking the search combo box list for the Document Category field, the system displays the appropriate label in all instances related to it.

LAN-1300: Tooltip Content is not Accessible to Screen Readers

Expected Result: In the Search Results table header, screen readers should read the tooltip content on the Viewed Results (Eye) and Add to View List icons.

Resolution: Fixed issue where tooltip content on the Viewed Results (Eye) and Add to View List icons in the Search Results table header was not accessible to screen readers. Now screen readers read the tooltip content for those icons.

LAN-1474: Change Fraud Alert Register/Unregister Email Links to Support Running Website Using Multiple Servers

Expected Result*:* When a Fraud Alert is registered / unregistered an email with a validation link is generated, this link should not be machine dependent. These links should not expire.

Resolution*:* Fixed issue where the validation link was leading to an error due to the use of non-authorization keys on the encryption, now a GUID value is generated and saved on the FraudAlert table, this GUID value is used on the link sent for the register/unregister Fraud Alert

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

process. For those Fraud Alerts where the registration process was not completed, the county database administrator needs to execute the following query to complete the process after updating the website.

Do not run this unless all existing fraud alerts need to be updated.

```
update FraudAlert set FullName = REPLACE(fullname,'__AuthenticatedFlagFalse__','')
```

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

LAN-1312: Update .NetFramework to 4.8

***Request Details*:** Update Landmark to .NetFramework 4.8.

***Resolution*:** Updated to .NetFramework 4.8. A smoke testing was performed to validate basic functionality after the update.

LAN-1467: Hide Guardian and Court Order Options on Marriage Kiosk

Request Details: Add an option to hide the Guardian and Court Order checkboxes on the Marriage Kiosk. It should be configurable to remove them.

Resolution: Added the setting **HideWAMarriageGuardianCourtOrderQuestions**, if the setting is true, it will hide the Guardian and Court Order options on the Marriage Kiosk.

Configuration*:*

Go to Main Menu → Administration → System Administration → Settings.

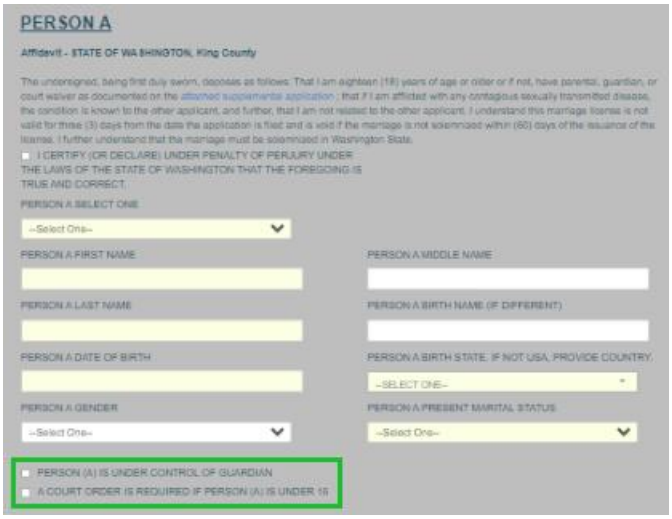

Find setting HideWAMarriageGaurdianCourtOrderQuestions.

Default Value: False.

Possible setting values:

True: The Guardian and Court Order options are hidden on Marriage Kiosk.

False: It shows Guardian and Court Order options on Marriage Kiosk.

Requires Admin Configuration

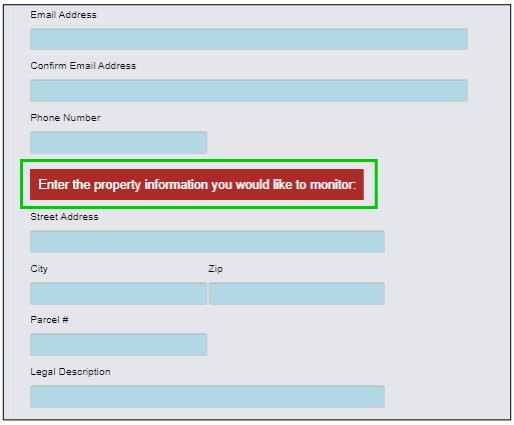

LAN-1483: Fraud Alert Registration Web Verbiage Change

Request Details: On a Fraud Alert Registration Form add the following verbiage “Enter the property information you would like to monitor” above any of the following fields Address, Parcel ID, and/or Legal Description. When those fields are not displayed this sentence should not be displayed.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Added the display of the sentence “Enter the property information you would like to monitor“ when Address, Parcel ID and/or Legal Description fields are displayed on the Fraud Alert Registration Form. When those fields are not displayed this sentence is hidden.

New Verbiage Displayed.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 93

Corrected Issues

LAN-1147: Log4Net Update NuGet Package

Expected Result: Log4Net assemblies should be updated.

Resolution: Fixed issue with Log4Net DLL (2.0.8.0) version. NuGet packages were updated to the latest version (2.0.15.0). In the installation folder e.g., C:\inetpub\wwwroot\Landmark, added Log4NetUpdate.txt file with details to manually update Log4Net version numbers.

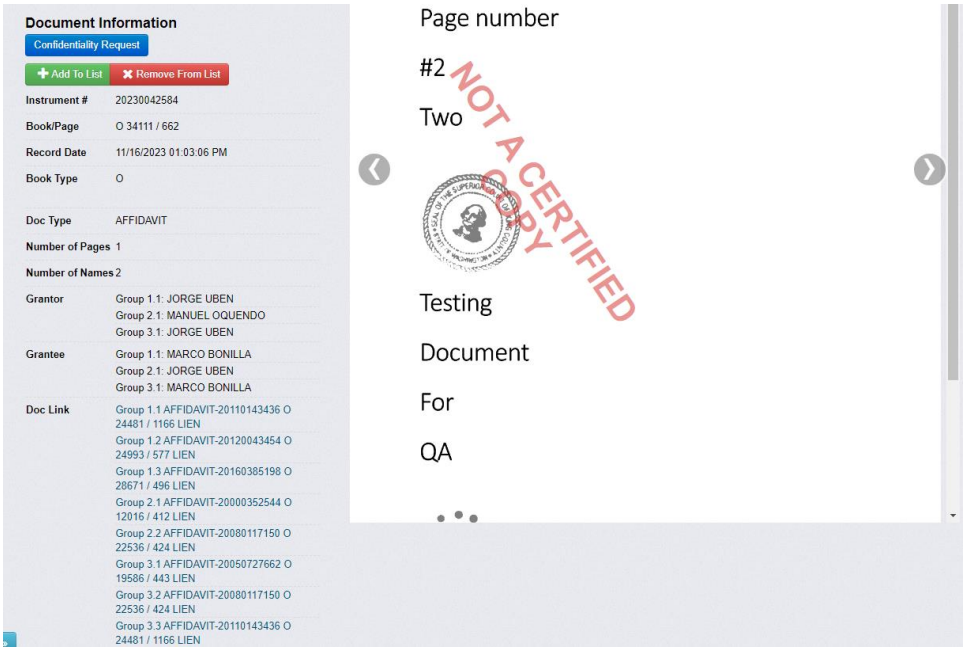

Log4NetUpdate.txt

```
In Web.config find the log4net assembly and update the version numbers to 2.0.15.0 like so:
<dependentAssembly>
    <assemblyIdentity name="log4net" publicKeyToken="669e0ddf0bb1aa2a" culture="neutral" />
    <bindingRedirect oldVersion="0.0.0.0-2.0.15.0" newVersion="2.0.15.0" />
</dependentAssembly>
```

LAN-1149: Missing Doc Link(s) in a Document with Multiple Groups

***Expected Result*:** All Doc Link(s) associated with a document should be shown when it has multiple groups and not only show a single Dock Link if it is in multiple index groups.

***Resolution*:** Fixed issue where Doc Link(s) that are in the same index group were missing when opening the document. Now, all Doc Link(s) associated with a document are displayed even if they are in multiple index groups.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

LAN-1219: Delivery Options Label Shown when Using Anonymous Shopping Cart

***Expected Result*:** The UnCertifiedEmailMessageCheckout label message should not appear when using the anonymous shopping cart.

***Resolution*:** Fixed issue where the UnCertifiedEmailMessageCheckout label message was displayed in the anonymous shopping cart causing confusion pointing out the site was using delivery queues for anonymous shopping carts. Now, the label message does not appear in the anonymous shopping cart when the setting **UsingDeliveryQueues** is set to true, and the XML tag **AllowAnonymousShoppingCart** is also set to true.

LAN-1269: Property Fraud Alert Clears all Fields Except Parcel #

***Expected Result*:** When the user clicks "Send Confirmation Email" to register a notification fraud alert, all text fields should be cleared.

***Resolution*:** Fixed issue where property fraud alert fields were not cleared. Now, if the user returns to the page before completing the registration process, all fields are cleared out.

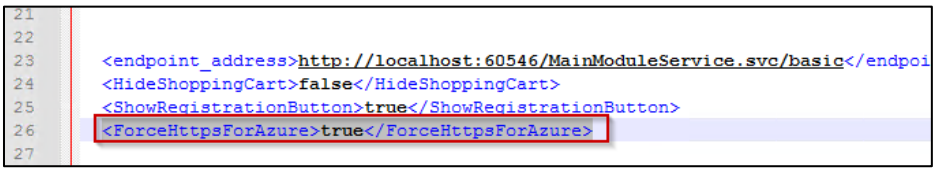

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

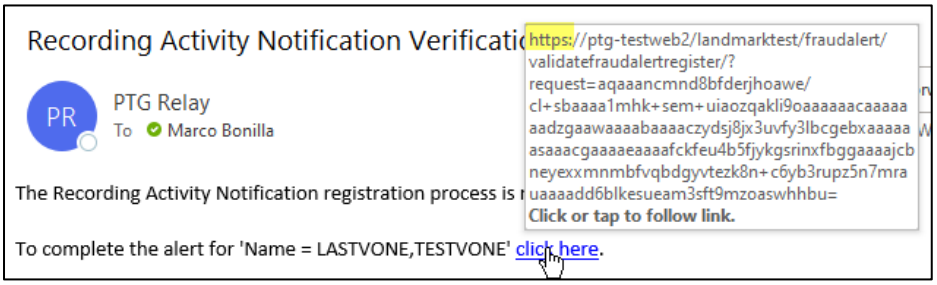

LAN-1188: Confirmation URL's Adjustment

Request Details: Add the ability to adjust the emailed confirmation link to start with https instead of http.

Resolution: Added a new tag to the connection XML file: ForceHttpsForAzure - set this to true when running in Azure for the emailed confirmation link to start with https instead of http.

Emailed confirmation link for Fraud Alert:

LAN-1234: Add Formatting to the Parcel ID in Fraud Alerts

***Request Details*:** Add formatting to the parcel ID when registering it for fraud alert.

***Resolution*:** Added new setting **WebShowFraudAlertParcelIDFormat** to save the format for Parcel IDs. 9=numeric, a=alpha, *=alpha/numeric.

E.g.: 99-99-99-*9-*****.****, in the example, the first 6 characters (99-99-99) should be numeric, then an alpha/numeric (*) value is expected, followed by a numeric (9) value, and the last 9 characters (*****.****) should also be alpha/numeric values. If open text field is needed, leave the setting value empty.

LAN-1258: Customizable Sign-Up Emails for the Property Fraud Alert Process

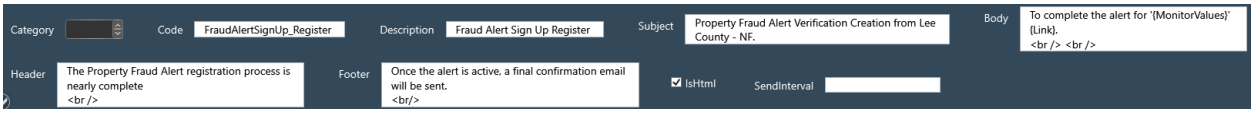

Request Details: Add the ability to configure customizable sign-up emails containing customizable text and variables for each type of sign-up email during the Register, Register Complete, UnRegister, and UnRegister Complete process of a Property Fraud Alert.

Resolution: Added customization of all sign-up emails required during the Register, Register Complete, UnRegister, and UnRegister Complete process of a Property Fraud Alert. All of them configurable from the EmailTypes of the Landmark Client Administration.

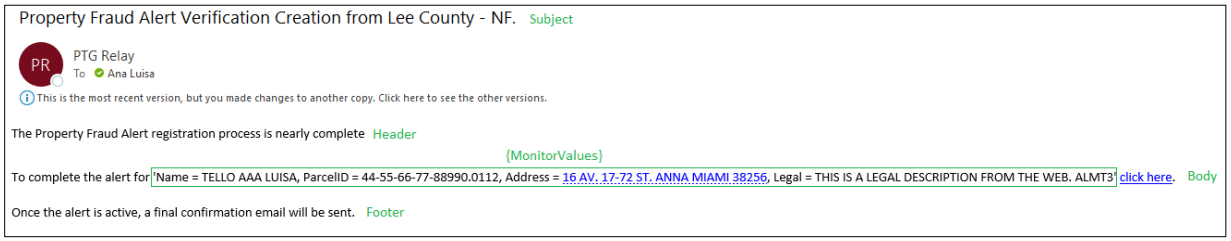

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

E.g.: FraudAlertSignUp_Register

Administration -> EmailTypes

Email

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 87

Corrected Issues

LAN-1106: SQL Injection String

Expected Result: URLs should not allow adding extra SQL syntax.

Resolution: Fixed issue where appending to a legitimate URL SQL syntax, it was retrieving extra information. Now, adding SQL syntax does not return any extra information.

LAN-1147: Log4Net Update NuGet Package

Expected Result: Log4Net assemblies should be updated.

Resolution: Fixed issue with Log4Net DLL (2.0.8.0) version. NuGet packages were updated to the latest version (2.0.15.0). In the installation folder e.g., C:\inetpub\wwwroot\Landmark, added Log4NetUpdate.txt file with details to manually update Log4Net version numbers.

Log4NetUpdate.txt

```
In Web.config find the log4net assembly and update the version numbers to 2.0.15.0 like so:
<dependentAssembly>
    <assemblyIdentity name="log4net" publicKeyToken="669e0ddf0bb1aa2a" culture="neutral" />
    <bindingRedirect oldVersion="0.0.0.0-2.0.15.0" newVersion="2.0.15.0" />
</dependentAssembly>
```

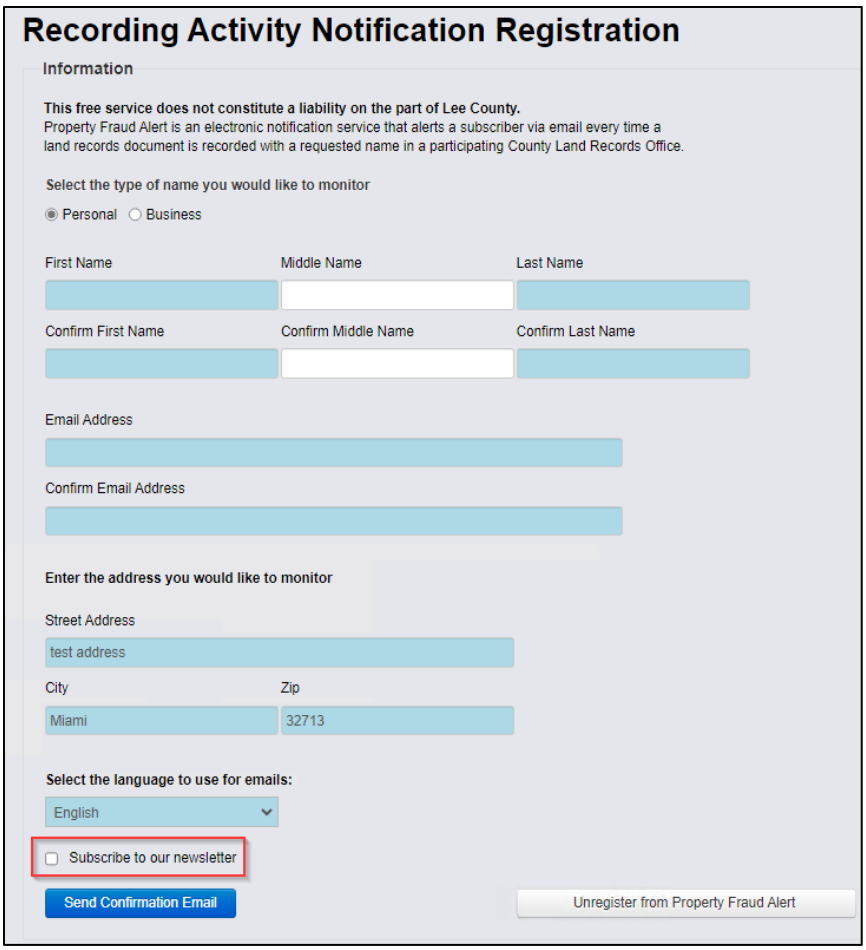

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

LAN-732: Fraud Alert – Add a Checkbox to Capture Email Address

Request Details: Add the ability to display a checkbox on the Property Fraud Alert Sign-up page to capture the email address of customers who wish to subscribe to a county newsletter.

Resolution: Added the setting **WebShowFraudCaptureEmailOptionMessage**, if populated, it will show a checkbox with the text set on the value of this setting on the Property Fraud Alert Sign-up page when people register. The value of the checkbox will be stored in the SubscribeEmail column from the FraudAlert table.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

LAN-1175: Property Fraud Alert Registration Process

Request Details: Add a new step to the registration process to prevent vulnerability.

***Resolution*:** Added a new setting **WebShowFraudCompleteRegisterCaptcha**. If the setting is set to true, in the confirmation email the user should receive a link to complete the alert, the link will take the user to a page that shows the ReCAPTCHA to validate and complete the process.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 85

Corrected Issues

110347: ORIS 414 - Search Results on Web

Expected Result: User should be able to see on the search result grid the results from the Lot Legal column properly displayed without a break tag in the first record. Also, the document details were not showing properly when index data was added using multiple indexing groups.

Resolution: Fixed issue where document detail was not showing properly when index data was added using multiple indexing groups. The Lot Legal column was adding a break in the first record. Now the column displays the record without the extra break.

110782: Web Sub-Account Changes are not Saved

Expected Result: Sub-Account changes should be saved.

Resolution: Fixed issue where sub-account information was not saving, now changes are saved and displayed on screen.

110790: Fraud Alert Signup Could be Done Without Specifying Language

Expected Result: User should not be able to submit Recording Activity Notification Registration form with an empty language.

Resolution: Fixed issue where submitting a Recording Activity Notification Registration form the user can send the information with an empty language selected.

111278: Deleted DocLinks Showing on Web

Expected Result: DockLinks that have been deleted by the user should not be displayed when searching and grouping the results by index.

Resolution: Fixed issue where DockLinks deleted in a transaction were displayed when performing a search and checking the “Show Index Group In Result”. Now the DockLinks deleted are not displayed.

111415: User can Submit Registration Form with First Name Confirmation Mismatch

Expected Result: User should not be able to submit Recording Activity Notification Registration form where First Name and Confirm First Name fields are not the same.

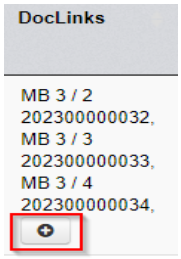

Resolution: Fixed issue where fraud alert was not validating if First Name and Confirm First Name matched, now both fields must be the same to continue registration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

111550: Maximum Number of DocLinks Displayed

Expected Result: The number of DocLinks that the system displays on the search grid is determined by the setting **WebMaximumSearchResultDocLinksLegals**.

Resolution: Fixed issue where setting a value for **WebMaximumSearchResultDocLinksLegals** was not respected and the system was displaying all the DocLinks in the search grid. Now the value set in the setting **WebMaximumSearchResultDocLinksLegals** is respected, also a plus icon button is added bellow the DocLinks list in the search grid if the DocLinks that a transaction contains are more that the value set in the setting **WebMaximumSearchResultDocLinksLegals.**

111554: Marriage Kiosk Required Phone Fields are not Highlighted

Expected Result: Marriage kiosk phone fields must be highlighted as they are required fields.

Resolution: Fixed issue where marriage kiosk required phone fields were not highlighted. Now marriage kiosk phone fields are highlighted in yellow as they are required fields and if they are left empty, they turn red.

111599: Alpha Index Search - Filter Listings Option not Limiting Results to From/To Range Entered

Expected Result: User should be able to perform an alpha index search and limit the results based on a from/to range entered.

Resolution: Fixed issue where after performing an alpha index search and limit the result based on a from/to range entered the result was not only retrieving records from the range wished. Now only the records from the range wished are retrieved.

111601: Not All Doclinks Are Showing on the Document Details Screen

Expected Result: User should be able to see the doclinks that are available in the document, the same doclinks that were saved in the database.

Resolution: Fixed issue where searching an instrument number the user was not able to see all the doclinks related to the instrument number. Now after searching for an instrument number the system shows all the doclinks related to the document.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

111622: FTP - Add New Subscription Button not Working When Orders are Displayed in the Grid

Expected Result: When clicking the add new FTP Subscription button the system should display the prompt to complete the subscription submission.

Resolution: Fixed issue where the add new FTP Subscription button did not display the prompt to complete the subscription submission when orders were shown in the grid. Now the add new FTP Subscription button displays the prompt and allows to complete the subscription submission.

111637: Error with Date of Document when Submitting Via eRecord

Expected Result: Users should be able to select document types from the eRecord screen that have date fields, set them to the desired date and submit the order without receiving any error.

Resolution: Fixed issue where field length validation for eRecord submissions was not handling dates properly.

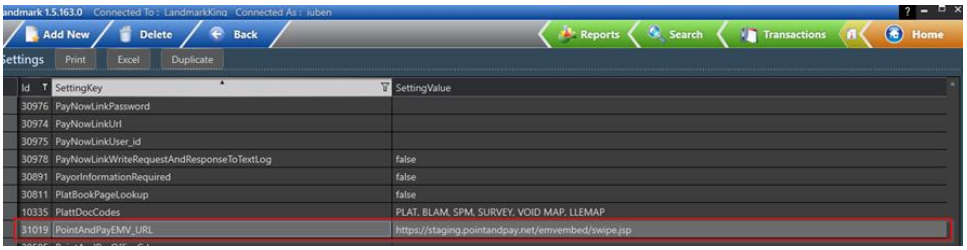

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

LAN-708: New Credit Card Swipers

Request Details: Add new credit card payment setting, when a user completes a transaction, a new screen with the new payment method should appear.

***Resolution*: PointAndPayEMV_URL** setting was added. The system shows a screen to process a payment when the setting is activated.

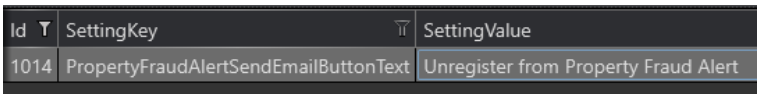

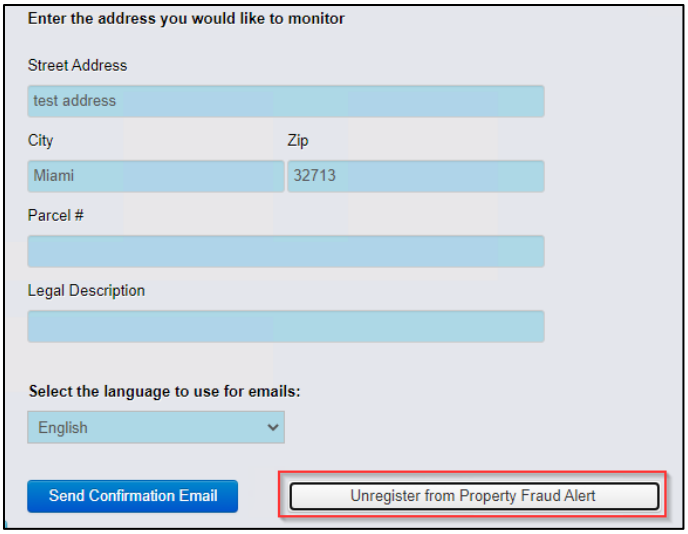

LAN-948: Fraud Alert – Change the Verbiage of the Cancellation Button

Request Details: Change the verbiage of the Edit/Cancellation button in the Property Fraud Alert screen from “Receive Email to Edit Property Fraud Alert” to “Unregister from Property Fraud Alert”.

Resolution: Added the setting **PropertyFraudAlertSendEmailButtonText**. The value set on this setting will be displayed in the verbiage of the button to unregister in the Property Fraud Alert screen. In the example below the setting value is: “Unregister from Property Fraud Alert”.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

11146: Domestic Partnership Kiosk

Request Details: Add ability to configure the fields that appear on the domestic partnership kiosk.

Resolution: Users will now be able to select the model that will be used for the domestic partnership kiosk. Added new settings **CivilUnionDataModel, WebMarriageKioskTitle,** and **WebCivilUnionTitle.**

- **CivilUnionDataModel –** this setting is used to control the model used by the domestic partnership kiosk. Changing the value of this setting will change the fields that appear on the kiosk screen.
- **WebMarriageKioskTitle –** this setting is used to control the title of the marriage kiosk. The value of this setting will be displayed on the marriage kiosk submission screen.
- **WebCivilUnionTitle –** this setting is used to control the title of the domestic partnership kiosk. The value of this setting will be displayed on the domestic partnership submission screen.

In addition, Question at the top of the form was removed, and these fields were also removed from the Domestic Partnership application: P1 Maiden Name, P1 Race, P1 SSN, P1 Date of Birth, P1 Birthplace (State or Foreign Country), P1 Ever Married, P1 Number of this Marriage, P1 Date Last Marriage Ended, and P1 Marriage Ended By**.**

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

14802: PayNowLink Credit Card Payment

Request Details: Add the ability to pay using the new Civitek website.

Resolution: Users will now be able to pay Escrow Balance, FTP Subscriptions, Service Requests, and eRecords using PayNowLink. These 7 settings must be set as follows:

CreditCardProvider = PayNowLink (This is not needed if only using PayNowLink on the Web but is needed if using in Windows).

1. **CreditCardProviderVendorSpecific** = PayNowLink
2. **WebExternalCreditCardProvider** = PayNowLink
3. **WebUseExternalCreditCardProvider** = true
4. **PayNowLinkUrl** = {Url Civitek}
5. **PayNowLinkUser**_id = {User ID Civitek}
6. **PayNowLinkPassword** = {Password Civitek}
7. **PayNowLinkItem_key** = {Item key Civitek}

In addition, set up a Payment Type for this and set the ProgramControl to: CREDITONLINEEXTERNAL (check 'AvailableForErecordWeb' to allow web payments for eRecords, FTP subscriptions and Service Requests).

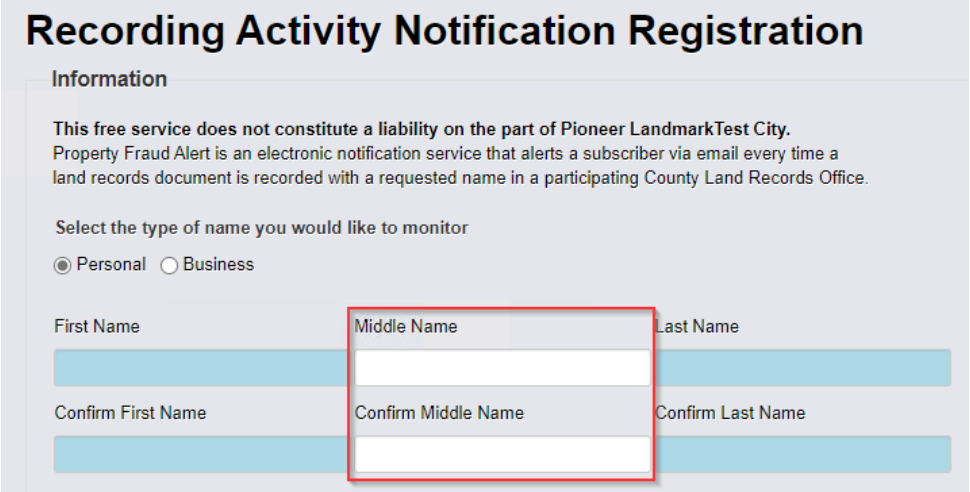

Requires Admin Configuration.

15112: Ability to Include the Middle Name in the Fraud Alert Registration

Request Details: Add the ability to include the middle name field in the fraud alert registration form.

Resolution: Added the setting **ShowMiddleNameOnWebForFraudAlert**, if it is set to true, the middle name will show on the web for fraud alert registration. When set to true, the **LegalDisclaimerFraudAlert** setting must be updated to tell the users to register the names both with and without middle names so the fraud search can find them**.**

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

15322: New Variables for Parcel ID

Request Details: Add new variables to store the parcel Id with dashes if they are not in the parcel Id.

Resolution: Updated variables that can be used for property appraiser and tax collector hyperlinks, they can store the parcel Id with dashes.
Settings: **PropertyAppraiserLink**, **ParcelPropertyAppraiserUrl**, **ParcelTaxCollectorUrl**.
Variables: {parcelid} {parcelidnodash} {parcelidwithdashes} [ParcelID] [ParcelIDNoDashes] [ParcelIDWithDashes].

Requires Admin Configuration.

15325: Add Setting to Hide Legal Description and Parcel Id from Fraud Alert

Request Details: User should be able hide the legal description and parcel Id from the fraud alert.

Resolution: Legal description and parcel Id can be hidden from the fraud alert by using the next settings **WebShowFraudAlertParcelID** and **WebShowFraudAlertLegalDescription**. When setting WebShowFraudAlertParcelID value is set to False the parcel Id field will hide from the fraud alert, if the setting value is set to True the field will be displayed. When setting WebShowFraudAlertLegalDescription value is set to False the legal description field will hide from the fraud alert, if the setting value is set to True the filed will be displayed.

Requires Admin Configuration.

15374: Add Option for Users to Bring Back Grouped Search Results

***Request Details*:** Add an option to display the Search results in the Book/Page column in groups.

Resolution: Added the Show Index Groups In Results checkbox in the Search screen. When this option is selected, the values in the Book/page column will be grouped.

15375: Allow Begin Date Calendar to go Back in Time

Request Details: User should be able to select dates before the oldest date set for the Begin date.

Resolution: Update date picker controls to allow dates before the oldest date set in the begin date.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 72

Corrected Issues

109819: Abstract Search Recording Group

Expected Result: Users should be able to select the document type(s) and/or document category within the abstract search.

Resolution: Fixed issue where within the abstract search there were no options to select the document type(s) and/or document category.

110081: eRecord Credit Card Payments not Working Properly without Provider Tokens

Expected Result: The user should be able to pay eRecord orders even if the provider is not using tokens.

Resolution: Fixed issue where eRecord credit card payments would not work if the provider was not using tokens. In addition, fixed issue where eRecord orders using payment type Credit Card Online were not possible to complete.

110206: Fraud Alert Email Should Use Customer Type Setting

Expected Result: Fraud alert registration emails should use customer type setting instead of hard coded county.

Resolution: Fraud Alert verification emails now use setting **Customertype** to handle customers that are not counties***.*** Fraud alert registration email subject line should say city instead of hard coded county.

Requires Admin Configuration.

110215: Setting DPICheck not Working Properly on New Order Submissions

Expected Result: In the Erecord process, **DPICheck** setting should properly show alerts when documents do not meet DPI resolution.

Resolution: Fixed issue where Internal Erecord was incorrectly showing documents as not being 300 dpi when setting DPICheck was 1 or 2.

110218: Paying Shopping Cart Could Throw Error

Expected Result: Users should be able to pay for an order successfully in the shopping cart screen.

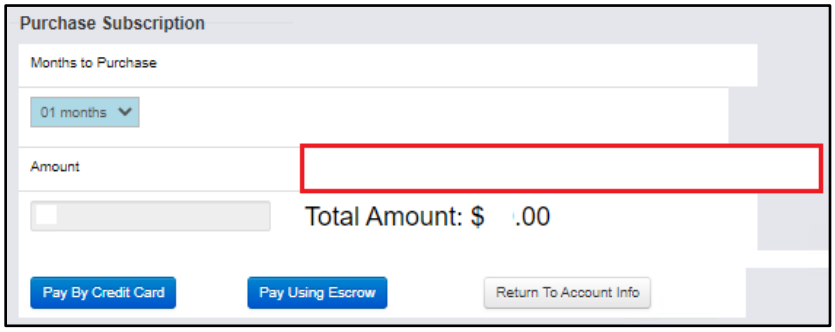

Resolution: Fixed issue where paying at the shopping would throw an error.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

110284: Cherokee – Label 'Credit card convenience fee' was Removed

Expected Result: In the Account Info -> Maintain Subscription screen, convenience fee label should be removed.

Resolution: Fixed issue where credit card convenience fee was being shown when it should not when using an external credit card provider, now the label is no longer displayed.

110288: Internal eRecord not Returning the Invalid Format Message

Expected Result: In the eRecord screen, when setting eRecordAllowColorImages is set to false and a color image is imported, an invalid format message should be displayed on screen to let the user know that the image is not valid.

Resolution: Fixed issue where internal eRecord submission was not submitting the order, the site was crashing when setting eRecordAllowColorImages was set to false, now an invalid format message is displayed to the user.

110347: Field Lot in Search Results Grid Not Properly Aligned

Expected Result: In the Search results table, Lot column should be aligned with all other columns.

Resolution: Fixed issue where Lot column was showing shifted down.

110367: eRecording Status Email is not Received

Expected Result: An automatic email should be received when an eRecord is suspended or when the transaction is completed.

Resolution: Fixed issue where eRecord email notifications where not created, now an email is received when a suspense is added to a document or when the transaction is completed.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12051: Palm Beach – Marriage Model

Request Details: Users would like a way to configure and condense the intro page of the Marriage Kiosk. Also add a new check box to confirm if they completed the premarital course.

Resolution: Added new MarriageIntroModel value 'palmbeach'. Use setting MarriageIntroTitle to configure the introductory message, setting MarriageIntroParty1Question to configure the first question, and setting MarriageIntroParty2Question to configure the second question. Added a check box at the top to confirm if they completed the premarital course.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 61

Corrected Issues

109122: Missing Scroll Bar and Resize Ability in the Split View Option

Expected Result: Users that select the Split View option in Search Results should be able to scroll down through the grid and resize the split area as they desire.

Resolution: Fixed the next issues with the Split View option in Search Results: scroll bar missing from the grid, resizer missing when performing a new search and the bottom scroll bar visible until resize.

109562: Search Sorting not Working Properly

Expected Result: Search results should be sorted properly in ascending and descending order in the Book and Page columns.

Resolution: Fixed issues when sorting in ascending and descending order. Added setting **BookPageSearchFormatLength**, this setting determines the length of the book and page columns in search, it will pad with zeros for sorting columns.

Requires Admin Configuration.

109752: Error Viewing Document Details with Doclinks

Expected Result: Users should be able to view the document details when the document contains docklinks.

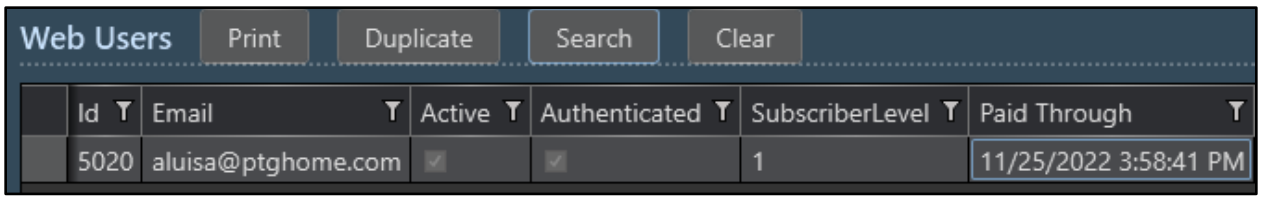

Resolution: Fixed issue where viewing a document details when the document contains doclinks the system prompts an error making unviewable the whole document.

109760: Doubled Month Web Subscription

Expected Result: Web subscription should be increased with the months the user paid.

Resolution: Fixed issue where payments applied when maintaining web subscription was setting the Paid Through date incorrectly, the number of months were applied twice. In addition, fixed issue where escrow payments were not updating subscription history table with correct dates. Now, WebUser.PaidToDate and SubscriptionHistory.PriorPaidToDate fields save the new value. The field PiorPaidToDate is misnamed, and it supposed to save the new date.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

109813: Abstract Search Producing Duplicates

Expected Result: Users should not get duplicate records when searching abstract search.

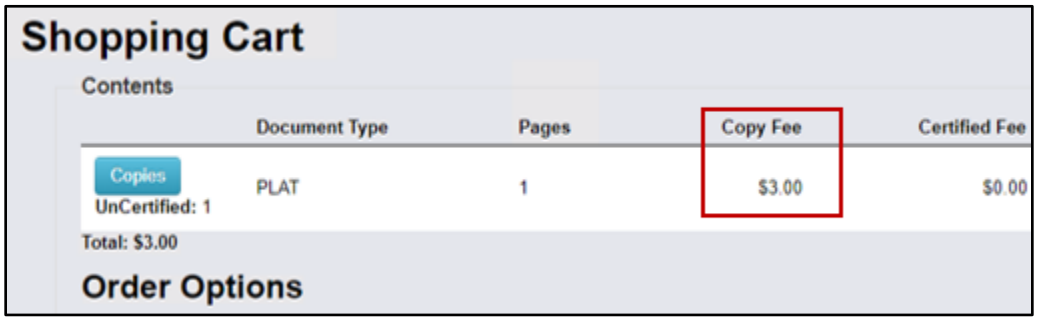

Resolution: Fixed issue with abstract search returning document records more than once.

110013: Plat Copies and Order History Not Handled Properly

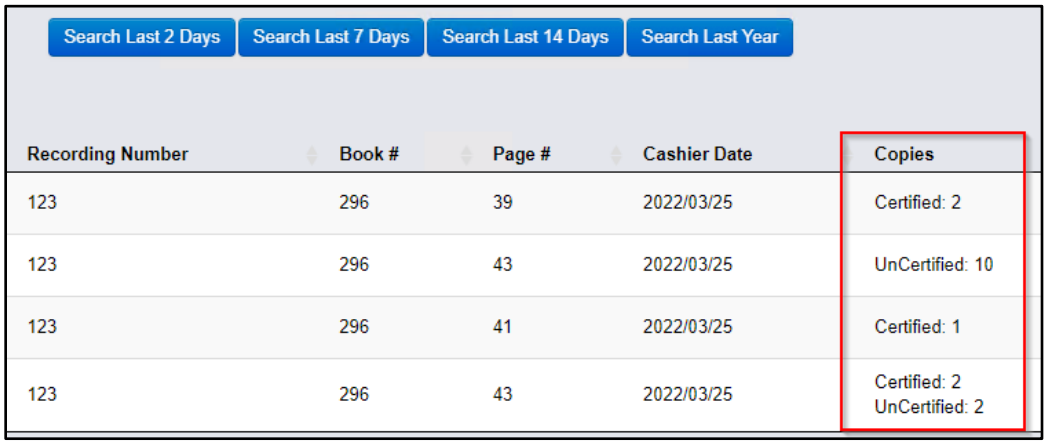

Expected Result: Plat copies fee should be correctly applied when purchasing copies for documents set to apply it and order history should display the number of copies purchased.

Resolution: Fixed issue where plat copies were not handled properly when setting: **WebCartCopiesPerDocument** is true. Also fixed issue where order history was not showing proper number of uncertified copies purchased.

Plat copies fee applied to the document:

Number of purchased copies column in the Order History screen:

Requires Admin Configuration.

110030: Adding a Document to the Cart the System adds the Wrong Documents into the Cart

Expected Result: Users should be able to add documents to the cart and the system must add the selected ones.

Resolution: Fixed issue where incorrect document information and image were added to the cart.

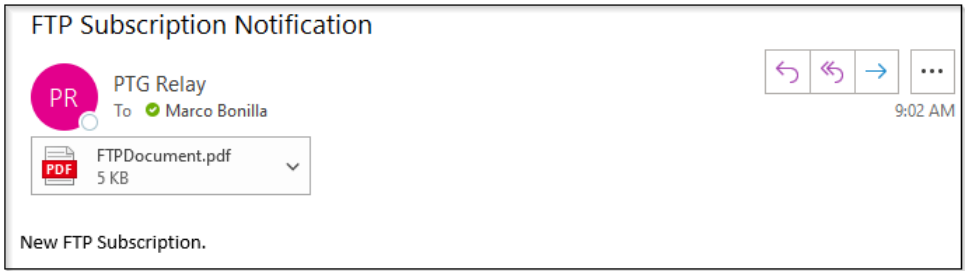

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

11875: Send FTP Submittal Document as Attachment in the Subscription Notification Email

Request Details: Users would like to receive the FTP submittal document as an attachment to the notification email sent after the FTP subscription gets paid.

Resolution: Added logic so the FTP submittal document now is sent as attachment to email when subscription gets paid. The email is sent according to setting **FTPSubscriptionNotificationEmail** value.

12239: Abstract Search Needs to Include Date Range

Request Details: In the Abstract search screen, users should be able to filter data using a date range and by selecting a period of 7, 30 or 90 days.

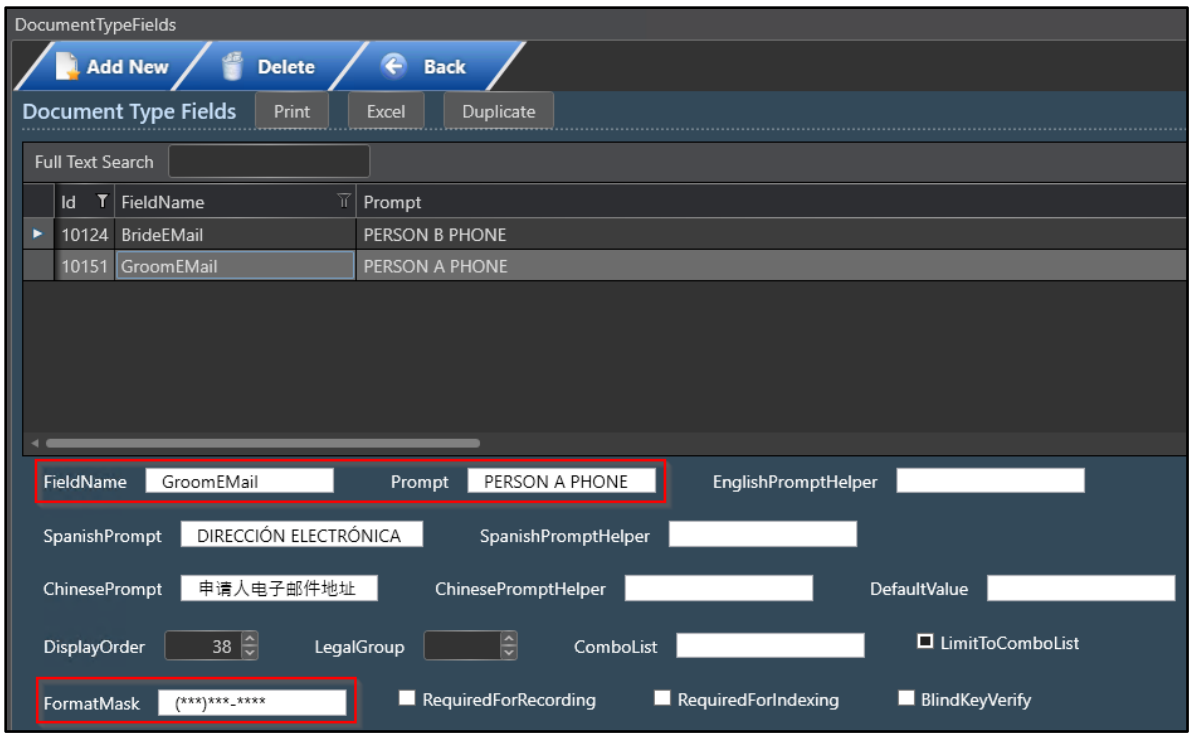

Resolution: Date range is now available in the Abstract search screen, the user can also select a period by choosing last 7, 30 or 90 days in the "Search the last … Days" drop-down list.

14481: Ability to Use the Email Marriage Kiosk Fields as Phone Numbers for Washington Counties

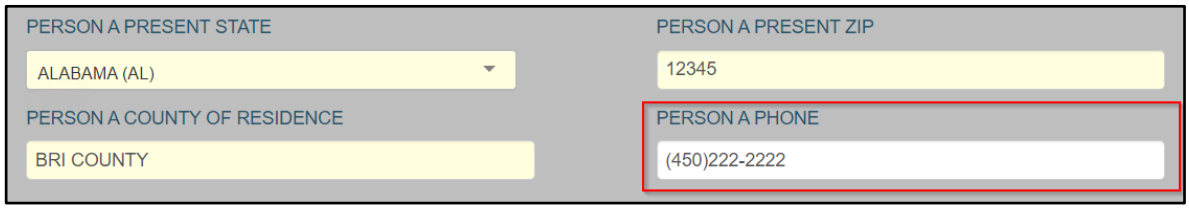

Request Details: Users would like that the customers would be required to input their phone numbers on the kiosk fields when applying for a marriage license.

Resolution: Added logic so Washington State Marriage Kiosk will require phone number if the field is not setup for email. **MarriageDataModel** setting value 'kingwa' is the only model affected by this change. To set the phone numbers as required fields users need to keep the existing email fields in place and change the prompt and format mask, by selecting the related field in the Document Type Fields and updating it as shown below:

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

The phone number input will be displayed in the application form:

Requires Admin Configuration.

14670: Agent Address for Certified Copy Requests

Request Details: Agent address information must be saved when data is entered on the web.

Resolution: Fixed issue where address information filled out on 'Credit Card Checkout' and 'Web User Account' screens was not saved to transaction agent and payment areas.

14752: Instrument Search Drop-Down Should Display 'Greater Than Or Equal To'

Request Details: In the Instrument Search screen, users would like to see 'Greater Than Or Equal To' instead of 'Greater Than Or Equals To' in the drop-down options.

Resolution: Wording was updated on instrument search drop-down list.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 52

Corrected Issues

109338: Watermarks Not Applied Correctly After Purchase

> ***Expected Result:*** When setting **WatermarkFreeImageAfterPurchase** is false, the view/download/print button on the View Orders screen should all provide images WITH the watermark. Previous functionality allowed the download button to present a watermark free image.
>
> ***Resolution:*** Fixed an issue with watermarks not being applied properly for purchased documents when **WatermarkFreeImageAfterPurchase** is set to false.

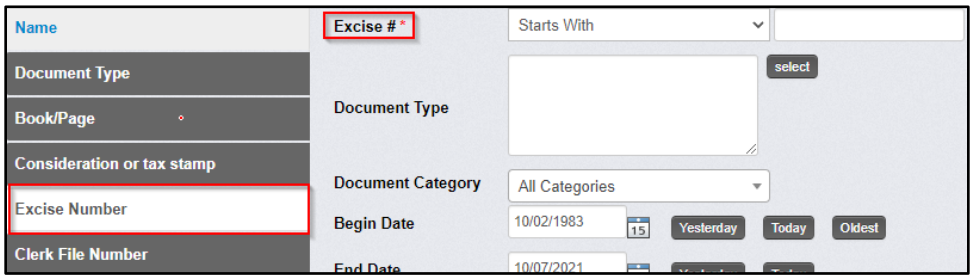

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

Expected Result: Users should be able to set Address Confidentiality Program Message when no language is selected.

Resolution: Added setting **NoLanguageACPMessage** to set Address Confidentiality Program message when no language is selected.

Requires Admin Configuration.

109170: Section Selected for Zooming is not Displayed on Screen

Expected Result: User should be able to select any area of a document to zoom in and the system should zoom the selected area.

Resolution: Fixed issue with zoom selection not working with new full size header image being used.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 47

Corrected Issues

107840: Download Uncertified Documents Only Downloads First Document

Expected Result: After making a web purchase of uncertified documents, the Download Documents button and delivery email should both contain all purchased documents.

Resolution: Fixed issue where web purchase emails and the Download Documents button on the web would only contain the first document in the purchase.

108460: Alpha Index Search Screen Download Option Not Working Properly

Expected Result: Users should be able to download the selected image when navigating through a document in Alpha Index Search screen using the Download button.

Resolution: Fixed issue where Alpha Index Search screen download button would download the wrong image.

108597: Web Cart Total is Different Than What is Actually Charged

Expected Result: The shopping cart balance should match the total amount shown on payment screen.

Resolution: Fixed issue where shopping cart balance was not the same as shown on payment screen.

108614: Web Setting HideWebEmailCertOption Not Working as Intended

Expected Result: When setting: **HideWebEmailCertOption** set to true, email option should not show, when there are certified copies in the cart.

Resolution: Fixed issue where setting: **HideWebEmailCertOption** was not showing/hiding email option properly.

108621: Error Message Requiring Email Address when it is Already in Web Form.

Expected Result: When setting **UncertifiedDocumentsUseDeliveryQueues** is set False and making a web purchase of uncertified documents, the system should not require email address as a mandatory field to process the purchase on web.

Resolution: Fixed issue when setting **UncertifiedDocumentsUseDeliveryQueues** set to **False,** and processing uncertified documents purchase required email address as mandatory field even though is not required on web.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

108655: FTP Subscriptions and Service Requests Payments Not Processing Correctly.

Expected Result: User should be able to process FTP Subscriptions and Service requests payments successfully.

Resolution: Fixed issues where FTP Subscriptions and Service requests payments would not process correctly.

108669: Parcel Number Search Error on Landmark Web

Expected Result: Performing a Parcel ID search, while **ParcelSearchRemoveSpecialCharacters** is set to true, should return search results properly.

Resolution: Fixed issue where doing a Parcel ID search when setting **ParcelSearchRemoveSpecialCharacters** set to true would cause an error.

108715: Broken Link on Support page

Expected Result: Links displayed on the support page should take the users to a valid web page.

Resolution: Fixed issue where the google link on the support page was broken.

108725: Printing Function Not Working in Document Details Screen

Expected Result: User should be able to use the printing options available in the Document Details Screen to print the document depending on the options chosen, Print Viewable Area, Print Current Page, Print all Pages and Print all Purchased Document.

Resolution: Fixed issue where printing options in Document Details Screen gets frozen and never shows a message to continue the download process.

108726: Search Result is not Displayed in Internet Explorer 11

Expected Result: User should be able to perform a valid search and the system displays the result at the bottom of the web using internet explorer 11.

Resolution: Fixed issue where performing a valid search did not display the results at the bottom of the web using internet explorer 11.

108727: Previous/Next Navigation Pop-Up Window did not Show Document Info

Expected Result: User should be able to hover over previous/next navigation buttons then the pop-up message displayed should contained the next/previous document information.

Resolution: Fixed issue where previous/next navigation pop-up window did not show document info.

108733: Search Button Not Working as Expected

Expected Result: Search button on the top menu should default to Name search.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Fixed issue where clicking on search on top menu was defaulting to legal search instead of name search.

108741: Return to Search Results Description Pop-up

Expected Result: Return to Search Results button should behave properly when clicked.

Resolution: Fixed issue where navigate back to search result popup would not close.

108749: Credit Card Amount Issue When Adding Escrow

Resolution: Fixed issue where users get error when not verifying copies.

107441: Hidden Web Images Question for Landmark Web

Expected Result: Users should not be allowed to purchase pages that were marked "Hide From Web" when added to the cart.

Resolution: Fixed issue where users could purchase pages that were marked "Hide from Web" when added to the cart.

108596: Uncertified Copies Amounts Showing Incorrectly

Expected Result: The amounts for uncertified and certified copies inserted in the Copies option should update properly in the Shopping Cart screen.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Fixed issue where amounts for uncertified and certified copies were not updating properly in the Cart screen.

108597: Web Cart Total is Different Than What is Actually Charged

Expected Result: The shopping cart balance should be the same as shown on payment screen, regardless of the order option selected by the user.

Resolution: Fixed issue where shopping cart balance was not the same as shown on payment screen

108644: The System Prompts an Error Message when Purchasing Valid Documents

Expected Result: The system should add any valid document to the shopping.

Resolution: Fixed an issue that occurred when adding a valid document to the shopping cart. The System will no longer give the error message "This document does not have any images available for web purchase" and prevent you from adding the document to the cart when a valid image does exist.

108471: Credit Card Amount Showing NaN

Expected Result: Total amount should be displayed properly when selecting credit card as payment method at the moment of processing an eRecord Order.

Resolution: Fixed an issue where amount was displaying as NaN instead of the correct amount.

108648: Checkout Amount Not Formatting Properly

Expected Result: Total amount should be displayed properly when purchasing documents and paying by credit card.

Resolution: Fixed issue where amount was not displaying when purchasing document copies and paying by credit card.

108113: **RemoveCommasFromNameOnWeb** Does Not Remove Commas From the Search Column

Expected Result: When setting: **RemoveCommaFromNamesOnWeb** set to true, commas from the search name column in the search grid should be removed.

Resolution: Fixed issue where setting: **RemoveCommaFromNamesOnWeb** was failing to remove commas from the search name column in the search grid as opposed to only removing commas for the grantor and grantee columns.

108344: Official Records Search Subscriber Account Registration Error

Expected Result: Potential users should be able to register a new account using a valid email format.

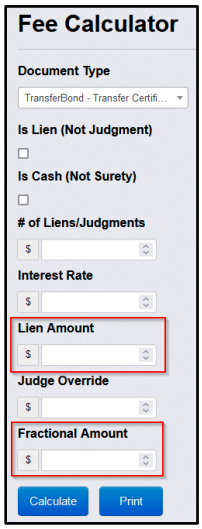

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Fixed issue where new account registration would return message 'Invalid Email Format' even though the email format was valid.

108391: Fee Calculator Missing Fields Needed to Calculate Fees

Expected Result: Lien Amount and Fractional Amount field should show

Resolution: Fixed issue where Fee Calculator was not showing Lien Amount and Fractional Amount to calculate fees on doctype.

108398: Calculated Legal Description Not Showing on Legal Column in Search Results

Expected Result: The calculated legal description should show in the legal column in search results.

Resolution: Fixed issue where calculated legal description was not showing in the legal column in search results.

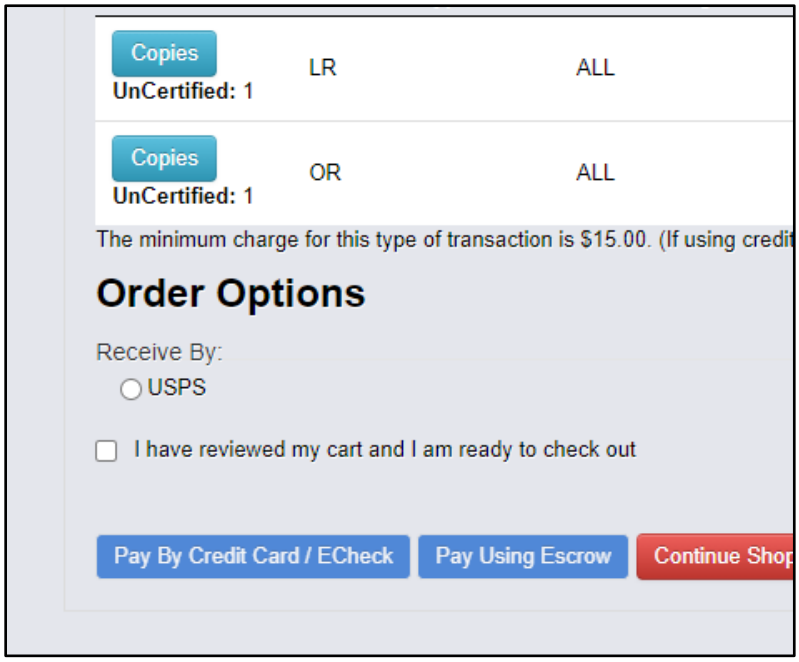

Legal	Location	Lot
LOT 1 BLK 1 SUB BURGER KING	Main	1
LOT 213 SUB THE KIND OF NAME A TEST WOULD HAVE Legal TESTING	Main	213
L LOTTO S 7 T 01 R 5	Main	LOTTO

108614: Web Setting HideWebEmailCertOption Not Working as Intended

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Expected Result: Users should be able to hide the Email option in the Shopping Cart screen by setting the **HideWebEmailCertOption** to true.

Resolution: Fixed issue where Setting **HideWebEmailCertOption** was not hiding the Email option in the Shopping Cart screen when set to true.

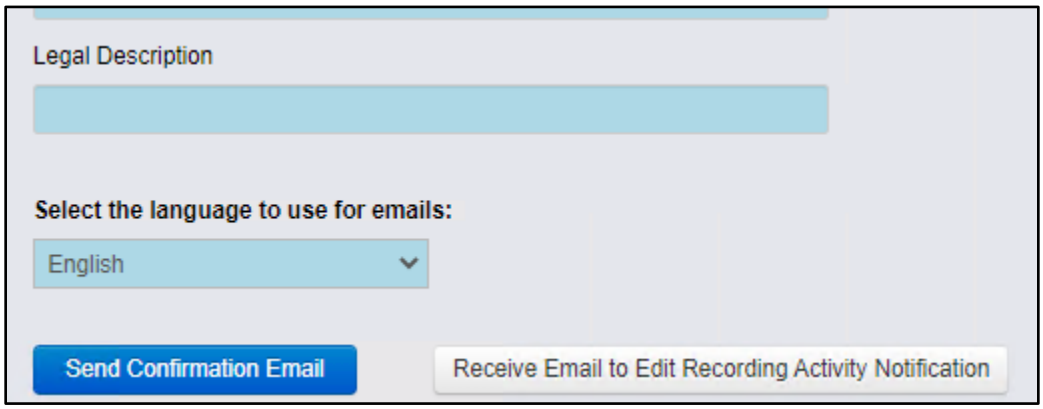

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12175: Add Legal Description to Track Against Fraud Alerts.

Request Details: User needs legal description added to track against fraud alerts.

Resolution: Added legal description to fraud alert web registration form.

12197: Multiple Alpha Indexes

Request Details: Users would like to have multiple alpha index searches.

Resolution: Alpha index is modified to have multiple index searches, using the current settings with a comma-delimited specification for both the model and the model title. All the Indexes can be viewed when configuring the Setting **AlphaIndexModel** and the setting **AlphaIndexMenuTitle.**

12227: Add Postage Fee for Copies in Cart Screen

Request Details: Customers would like to add Postage Fee to first document on the list and add a setting for a message to display, explaining the extra fee.

Resolution: Added Postage Fee combined to first document on the list. Added setting **WebPostageInfo**, in order to configurate message to display, explaining the extra fee.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

12438: JQuery Vulnerability

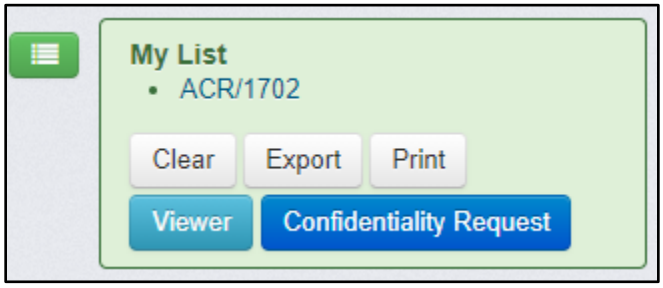

Request Details: Update the jQuery Package to a newer version.

Resolution: Updated jQuery to version 3.5.1 and jQuery UI to version 1.12.1.

12593: My List Confidentiality Request

Request Details: Users would like to have a confidentiality request functionality added on My List.

Resolution: Added ability to do confidentiality request on my list, it will now submit a request for each of the documents.

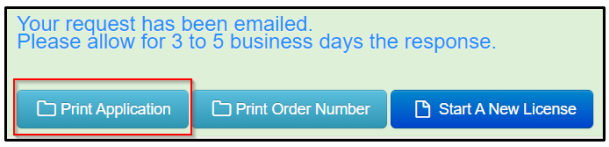

12950: Added the Ability to Print the Marriage Application Form

Request Details: User would like to have a “Print Application” button after submitting a marriage application from the Landmark application kiosk.

Resolution: Added the setting ***MarriageApplicationPrintProgramControl*** that must be set with the ***ProgramControl*** value for the corresponding Marriage Application Query record.

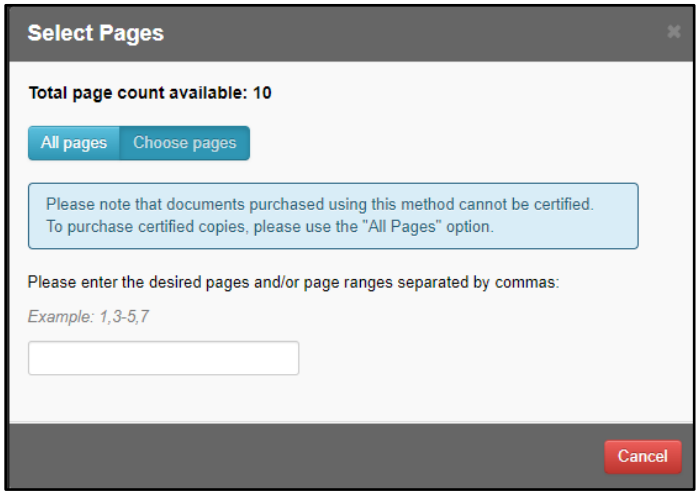

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

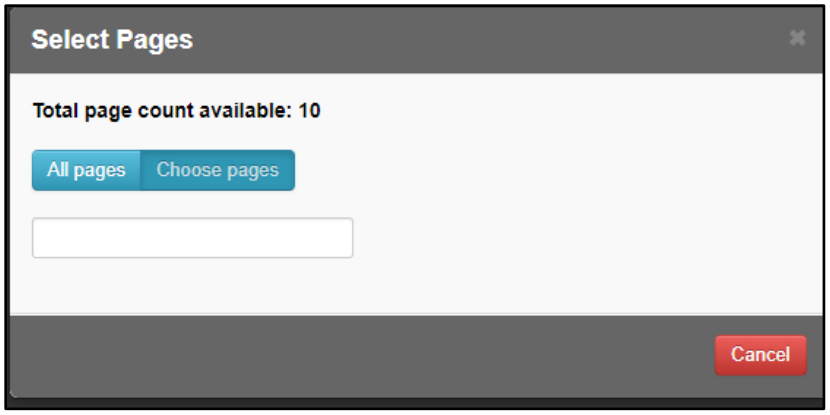

12974: Remove Incorrect Text Message About Ordering Certified Pages

Request Details: Users would need to control the content showed in Select Pages pop up message, when choosing pages from a document to their cart.

Resolution: Added new setting **WebDocPurchasePageSelectionHelpMessage** to control the content showed in Select Pages pop up message, when choosing pages from a document to their cart.

13300: Error Logging Detail When Download Image Error Occurs

Request Details: GetTifDocumentByCFN method should handle temp files properly, getting rid of all the temp files and providing a more detailed error logging.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Fixed issue with GetTifDocumentByCFN method to handle temp files better so that it is properly getting rid of all the temp files, providing a more detailed error logging.

13301: Error Receive when Attempting to Download Images from Web

Expected Result: Download files from web successfully.

Resolution: Fixed issue with **GetTifDocumentByCFN** method to handle temp files better so that it is properly getting rid of all the temp files.

13093: ERecord Field Length Validation

Request Details: Users would need a field length validation before submitting eRecord documents.

Resolution: Fixed length validation for eRecord submissions will now check the database field length and document type field max size.

13095: Add Max File Size to Upload ERecord Documents

Request Details: Users would like the ability to specify the maximum file size for eRecord submission.

Resolution: Added a new setting **MaxWebERecordFileuploadSizeInBytes**, erecord documents can be uploaded or scanned up to the maximum size of file in bytes that is mentioned in the setting value.

13147: Broken Access Control Vulnerability

Request Details: Add a notification or alert when authenticated account access other user's account using user's email.

Resolution: Updating account information will now use current account instead of input email.

13150: Attempts to Brute Force Both Login and Admin Page

Request Details: Users would like to have a captcha or timeout functionality after several failed logins to prevent brute forcing access.

Resolution: Added new settings **WebAccountLockTime** and **WebAccountLockCount** to control locking of accounts on wrong password input. **WebAccountLockTime** - number of minutes to lock account before allowing login access, based on **WebAccountLockCount**. **WebAccountLockCount** - amount of times user can input the wrong password before getting

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

locked out for a time based on **WebAccountLockTime**. Information about the incorrect password will be logged to LogInfo including IP.

13151: Verbose Error When Creating a New User

Request Details: Correct the error message displayed when creating a new user.

Resolution: Changed error message to display as less verbose, the full verbose error will be logged into log file.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 23

Corrected Issues

20887: Marriage Kiosk Restricted Characters

Request Details: Users need the ability to have the Marriage Kiosk automatically reject Marriage Kiosk applications with invalid text.

Resolution: When the setting **MarriageDataModel** is set to generic or kingwa, the Marriage Kiosk will fail to complete and warn the user upon submission of invalid characters to the first name, last name, middle name, or suffix name fields. Invalid characters are checked from the DocTypeFields blacklist.

108300: Search Skipping Rows

Expected Result: Landmark Web's Next Search Result arrow should correctly take the user to the next indexed search result.

Resolution: A fix has been applied to solve an issue where the Next Result Row arrow would take the user to the next page of search results, rather than the next row.

108328: View Print Dropdown

Expected Result: Users should be able to view Print or View/Print dropdowns.

Resolution: Fixed issue with dropdown menus not showing after jQuery update.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12430: Shopping Cart Menu Button Config

Request Details: Users need to be able to have some degree of control over the Shopping Cart button on the main Landmark Web menu.

Resolution: Two new settings have been added. **WebShoppingCartOnRight** will move the Shopping Cart button to be closer to the Login/Logout button when active. **WebShoppingCartLabel** can be configured to change the description on the Shopping Cart button.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 19

Corrected Issues

107788: Client Account Web Service Errors

> ***Expected Result:*** Valid users attempting to access Landmark Web Services should be able to regardless of the source of their account.
>
> ***Resolution:*** An error resulting from Landmark Client-sourced accounts attempting to access Web Services on Landmark Web has been resolved.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 18

Corrected Issues

106796: Palm Beach Marriage Kiosk Field Tabbing in FireFox

Expected Result: Users should be able to tab-select through the various fields in the Marriage Kiosk.

Resolution: Tab-select functionality has been restored and should allow the user to advance to the next field with the tab button on all browsers.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 16

Corrected Issues

106797: Start New Marriage Application Redirect

Expected Result: After completing a Domestic Partnership application, the Start A New License button should not redirect the user to the Marriage Kiosk instead of the Domestic Partnership application.

Resolution: Added new setting **MarriageStartNewLicenseGoBackToIntroPage**. When true, the Start A New License button that appears after license submission will redirect to the Marriage Intro page. When false, the button will redirect to a new application for the submitted application type.

Requires Admin Configuration.

107145: Duplicate ERecord Transactions

Expected Result: New ERecord transactions should not be duplicated on submission.

Resolution: Fixed an issue where ERecord transactions would duplicate when submitting credit card payment without selecting the credit card fee agreement checkbox when the user had an active escrow account.

107196: Prevent Internal ERecording

Expected Result: Add a way to prevent document types marked with PreventERecording from appearing in the document list for internal ERecords.

Resolution: Added the PreventInternalERecording flag to Document Types. Document types with this flag will not appear in the document list for internal ERecording on Landmark Web.

Requires Admin Configuration.

107211: No Token Received on Point and Pay ERecord

Expected Result: ERecord web submissions from Point and Pay should always receive a token. If a token is not received, the order should not be saved to the database and a message should be displayed.

Resolution: If no token is provided, payments for Point and Pay are not saved.

107245: Matching Names Search Captcha

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Expected Result: Using the Matching Names option when searching documents by Name should not invalidate the Captcha spam filter.

Resolution: Fixed an issue where the Matching Names search option would not work with Captcha.

107683: Misleading WebAllowInternalAnonymousUserToPurchaseHideFromWebDocuments Setting

Expected Result: When connection setting **WebAllowInternalAnonymousUserToPurchaseHideFromWebDocuments** is set to true, users on the internal web should be able to purchase document types marked as hidden from web.

Resolution: Fixed an issue where external anonymous users were able to purchase documents hidden from web when setting **WebAllowInternalAnonymousUserToPurchaseHideFromWebDocuments** was true. When the setting is set to true and the web location is set to "InternalWeb" hidden from web documents will not be restricted.

Requires Admin Configuration.

107778: Shopping Cart Copy Fee Calculation Error

Expected Result: The copy fee for the first document in the Shopping Cart should calculate and be added to the total correctly.

Resolution: Fixed an issue where the copy fee and total would not calculate correctly for the document in the Shopping Cart that would take on the web postage fee.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

11777: Domestic Partnership Field Defaults

Request Details: The Domestic Partnership form should respect document type field default values.

Resolution: The PalmBeach Marriage Kiosk Model will now respect document type field default values.

11992: Marriage Kiosk Race Requirement

Request Details: The Race dropdown on the Marriage Kiosk should not be required.

Resolution: The Race dropdown of the Marriage Kiosk is no longer required for submissions.

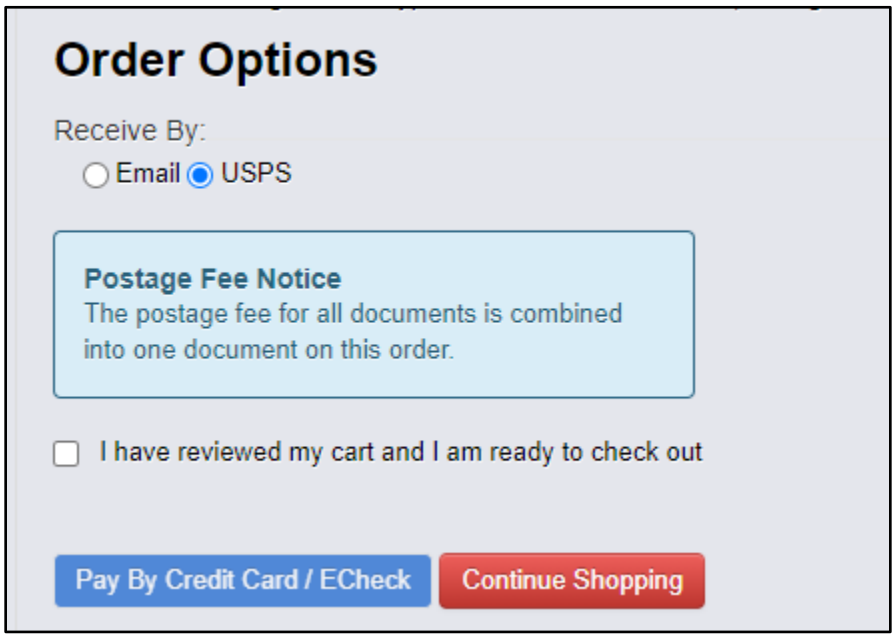

12227: Copy Postage Fee

Request Details: Users would like a way to calculate and display postage fees on shopping cart or order items before checkout.

Resolution: Added logic to calculate a postage fee when there is a fee configured with the ProgramControl "WebPostageFee". Also added new setting **WebPostageInfo**. The value of this setting controls the message shown to users when a postage mailing option is selected and can be formatted in HTML.

Example **WebPostageInfo**: <h4 class="alert-heading">Postage Fee Notice</h4>The postage fee for all documents is combined into one document on this order.

Web message:

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

12374: Marriage Kiosk Maximum Age Difference

Request Details: Add a way to enforce a maximum age difference between parties for minors in the marriage kiosk.

Resolution: Added new setting **MaximumYearAgeDifference**. The value of this setting is the maximum age difference allowed between parties on the marriage kiosk if one of the parties is a minor. Also added new setting **MaximumYearAgeDifferenceWebMessage** which controls the message shown to users if the maximum age difference for minors is exceeded.

Requires Admin Configuration.

12395: View Own Submitted Documents

Request Details: Add the ability to allow users to view documents they submitted even if the document is hidden from web.

Resolution: Added new right **WebViewSameAgentDocuments**. Users with this right will be able to view all documents submitted by their configured agent, including documents marked as HideFromWeb.

Requires Admin Configuration.

12406: Shopping Cart Certified Copy Defaults

Request Details: Documents in the shopping cart should not default certified fees and copy fees.

Resolution: Changed certified fees for uncertified and certified copies in the shopping cart so that they will calculate correctly.

12407: Uncertified and Certified Documents

Request Details: Add the ability to specify the amount of uncertified and certified copies on the same document.

Resolution: Updated the copy selection interface to allow for both uncertified and certified copies for one document.

12408: Order History Copies Ordered

Request Details: Add a way to display what kinds of copies and how many were ordered in the shopping cart order history.

Resolution: Added new Copies column to the shopping cart order history grid. This column will show what kinds of copies were ordered along with the number of copies ordered.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

12482: Web User Guide

Request Details: Add the ability to create a configurable User Guide for web users.

Resolution: Added the ability to configure a User Guide for web. To enable, create a folder named UserGuide in the Landmark root install location (no spaces) and place a user guide PDF in the folder. The PDF filename will be the label text on Web. If the filename is just a space, only the '?' icon will be displayed.

Requires Admin Configuration.

12530: View Confidential Document Fields

Request Details: Users would like a way to allow certain users to see confidential document fields.

Resolution: Added the right ViewConfidentialDocumentFields. Users with this right will be able to see document field entries that have been marked as confidential.

Requires Admin Configuration.

12569: Anonymous Service Request

Request Details: Add a way for web users to submit service requests anonymously

Resolution: Added new connection file setting **AllowAnonymousServiceRequest**. When true, anonymous users will be able to submit service requests.

Requires Admin Configuration.

12685: Multiple Web Service Request Links

Request Details: Users would like a way to add additional links to the web Service Request form.

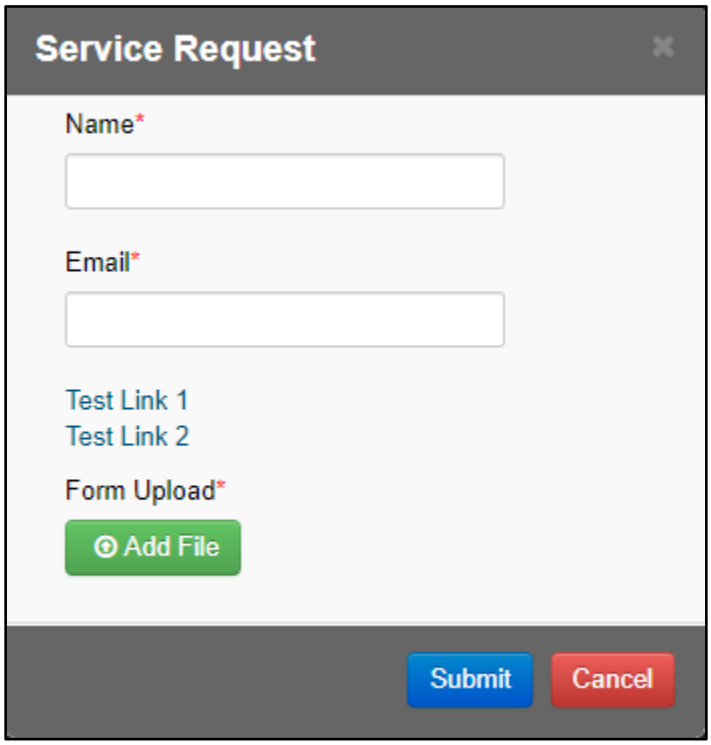

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Additional web Service Request links can be configured in HTML using divided HTML anchors in existing setting **WebServiceRequestAdditionalInformation**.

WebServiceRequstAdditionalInformation:

Test Link 1 Test Link 2

Web Service Request Form:

Requires Admin Configuration.

13082: Fraud Alert Languages

Request Details: Users would like to receive Fraud Alert emails in different languages.

Resolution: Users will now be able to select a language when signing up on web and will receive emails based on the languages configured in the Email Types table. Fraud Alert notifications will be sent in the user's chosen language. Fraud Alert languages are configured with an Email Types code starting with FraudAlert_ and {Language from fraud alert table}. There is no limit as to the number of languages, and each configured language will appear in a dropdown when setting up Fraud Alert notifications.

Example:

Email Types:

13125: Enable External Images for SSRS Reports

Request Details: Enable the use of external images in SSRS reports.

Resolution: SSRS reports now support external images.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 13

Corrected Issues

106346: Missing Document Delivery Method

> ***Expected Result:*** When required, document delivery methods should display properly in the shopping cart.
>
> ***Resolution:*** Fixed an issue where document delivery methods would not appear if setting **WebCartCopiesPerDocument** was true.

107195: Incorrect Items in Cart

> ***Expected Result:*** Items that are displayed in the cart should be the same as what was selected from the search results.
>
> ***Resolution:*** Reverted a previous code change that caused the items selected from the search results to not be the same as the items displayed in the cart.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12127: Search Hidden Books

Request Details: Users would like a way to allow certain users to search book types marked as Hidden From Web.

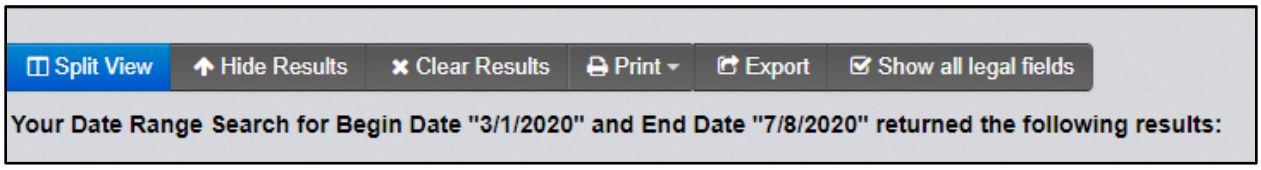

Resolution: Added the right "ACCESSBOOK_"+ {Book Code}. Users with this right bypass HideBook Book Type restrictions, allowing them to search and view the configured hidden book and its documents on the Web.

Requires Admin Configuration.

12137: Search Results Split Viewer

Request Details: Users would like to be able to view record details along side the search results grid.

Resolution: Users will now be able to view record details alongside the search results grid by using the new Split View button. If users do not select split view, they will be brought to the record details page. New setting **WebSearchSplitView** was added. When true, the split view button will appear. When false, users will not be able to view images in split screen.

Requires Admin Configuration.

12138: View Multiple List Images

Request Details: Users would like to be able to view multiple list images on the same page.

Resolution: Users will now be able to view multiple images from their list on the same page. New viewer button was added. New setting **WebMyListImageViewer** was added, this setting must be true for list images to be available on one page

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 12

Corrected Issues

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12326: Service Request

Request Details: Users would like the ability to order and request services and post payments via the web and phone.

Resolution: Added a new Service Request to the web. This new section is used for web users to order or request services and to submit a payment once the service request has been accepted. New setting **ShowServiceRequest** was added, this setting must be true for the service request queue to be enabled.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 11

Corrected Issues

106444: Bold Fields in Marriage Kiosk

Expected Result: Only fields that are marked as bold should appear bold in the marriage kiosk.

Resolution: Fixed issue where certain fields were appearing as bold when not expected.

106651: FTP | eRecord History after web payment is submitted.

Expected Result: Submit payment using FTP History page, then click on prompt to return back to "FTP History". Issue: This incorrectly redirects to the eRecord History.

Resolution: Fixed issue with link for FTP completion would take user to eRecord history page.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

12194: Require Address

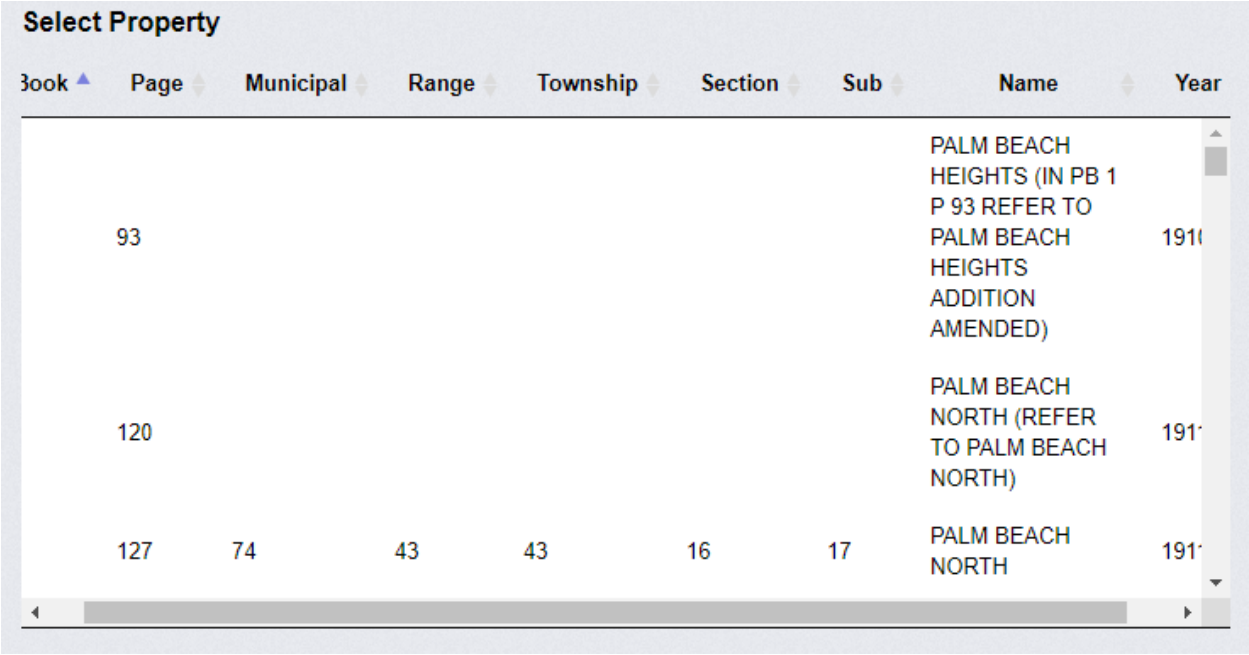

Request Details: Address should be required for new web user registration.

Resolution: Address, city, and state are all now required fields for new web user registration. Added new setting **WebUserRegistrationRequireAddress** was added. When this setting is true, address becomes a required field.

12368: Reorder Abstract Search Columns

Request Details: Users would like the abstract search results grid to be reordered.

Resolution: Reordered the abstract search results grid on the web. Results will now be displayed in the following order:

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 10

Corrected Issues

106467: eRecord Image Preview

Expected Results: Images that are submitted through eRecord on the web should appear in a preview window before the submission is finalized.

Resolution: Fixed an issue that was causing uploaded eRecord documents to not appear in the preview window. Now, users will be able to submit both .TIFFs and .PDFs and they will appear in the preview window.

106678: Book Type on Name Search

Expected Results: Users would like to be able to search by both name and book type.

Resolution: Fixed issue with the book type drop down on the name search screen. Now, name searches will only return the selected book type.

106694: Adding Cases to a List

Expected Results: Users should be able to add a case to a list without experiencing a memory leak.

Resolution: Changed the way documents are stored in session to reduce memory storage when added to a list. This prevents memory leaks and allows users with memory limits to add cases to a list.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 9

Corrected Issues

106297: FTP Payment Types

Expected Result: Users should only be able to add payment types that are available for eRecord web to FTP subscription.

Resolution: Fixed issue where payment types that were not set to available for eRecord web were shown on the FTP payment screen. Now, only payment types set to available for eRecord web will appear.

106331: Abstract Search

Expected Result: Abstract search should not appear on the web when it is not expected to.

Resolution: Fixed issue with abstract search appearing on the web when not expected to. Now if the setting **ShowAbstract** is set to false, abstract search will not appear on the web.

Requires Admin Configuration.

106353: Deed Document Search Error

Expected Result: Searching for the document category Affidavit – Deed should not throw an error.

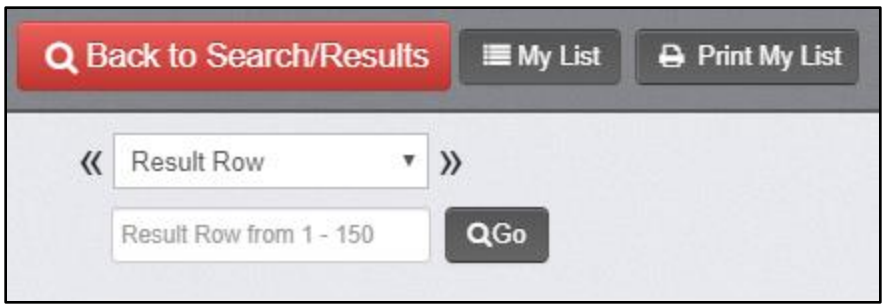

Resolution: Fixed issue with Georgia tables not being replaced correctly for DocumentReference.

106511: Back to Results Button

Expected Result: Users returning to a search from a document's detailed view should be returned to the spot the left the search results table at for easier browsing.

Resolution: The "Back to Results" button in a document's detailed view now correctly brings the user back to the search results table exactly where they left off.

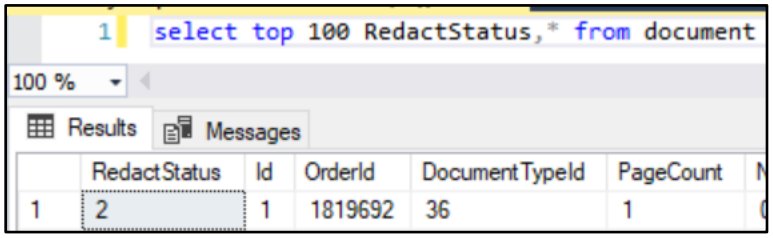

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

106512: Redact Status 3 Shown on Web

Expected Result: Documents with a redaction status of 3 (error) should not display on web.

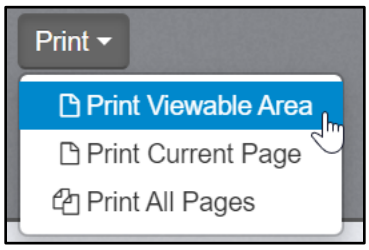

Resolution: Fixed issue where documents with a redact status of 3 would be shown on web. The redaction status can be found on the *document* table.

106513: Print Viewable Area

Expected Result: Selecting 'Print Viewable Area' should open a printer dialog screen to print the image.

Resolution: Changed image handling when using the 'Print Viewable Area' function.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

11937: FTP Process

Request Details: Users would like to be able to subscribe to FTP export on the web.

Resolution: Added new FTP subscription process to the web and client. Users will now be able to sign onto the web, fill out a linked FTP agreement form, submit it to the client for approval and pay for their subscription all through the web. Several new settings were added for this process:

- **ShowFTPSubscription:** This setting enables the FTP subscription section of the web
- **WebFTPSubscriptionReceiptMessage:** This setting controls the receipt message displayed after the FTP is paid for
- **WebFTPSubscriptionAdditionalInformation:** This setting controls additional information for the FTP subscription submission
- **FTPSubscriptionNotificationEmail:** This setting controls the notification email new subscribers receive
- New email type **FTPSubscriptionNotification** was added as well

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 8

Corrected Issues

105515: Multiple Charges in Credit Card Transaction

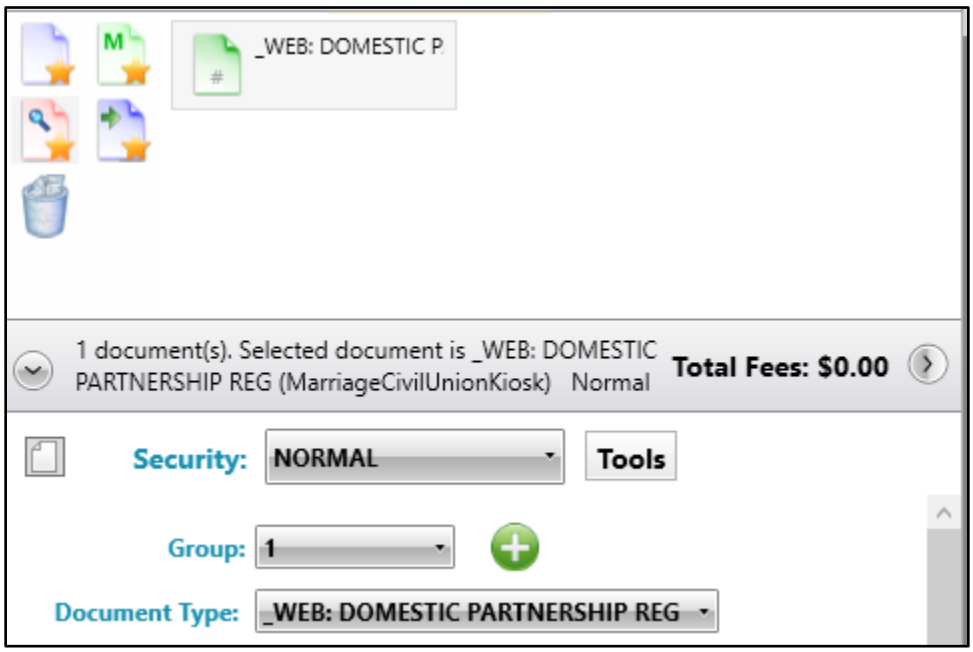

Expected Functionality: Additional logging is needed to determine what is sent to Government Windows and what is returned.

Resolution: Added logging to external credit card processing.

105824: Domestic Partnership Document

Expected Results: When a domestic partnership is submitted through the web kiosk, the transaction in client should contain a domestic partnership document.

Resolution: Fixed issue with domestic partnerships becoming marriage kiosk documents in the client. Now, if a domestic partnership is submitted through the web, the document in the client will be a domestic partnership document.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

11470: Validate Domestic Partnership Address

Request Details: Users would like a way to validate that both parties on a domestic partnership kiosk submission have the same address.

Resolution: Added setting **WebCivilUnionSameAddressMessage**. When filled out with a message, the message will be displayed upon attempting to submit a Domestic Partnership kiosk form if the entered Address, City, State, or Zip Code for Party 1 and Party 2 do not match.

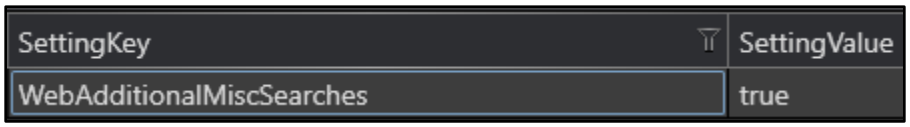

Requires Admin Configuration.

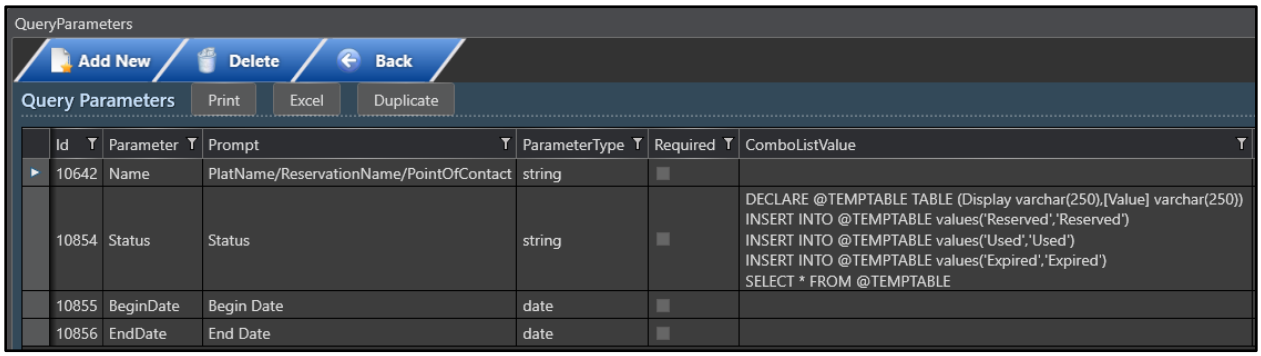

11505: Ability to Search a Plat Reservation and Other Custom Queries

Request Details: Add a search page for Plat Reservations. Search should have date range, Status, and Name.

Resolution: Added setting **WebAdditionalMiscSearches** to turn on additional search pages (true/false). Queries in the Query table with the flag **ShowOnWeb** set to true will have a search page (sorted alphabetically). The input parameters displayed will match the QueryParameters that are configured in the Query table.

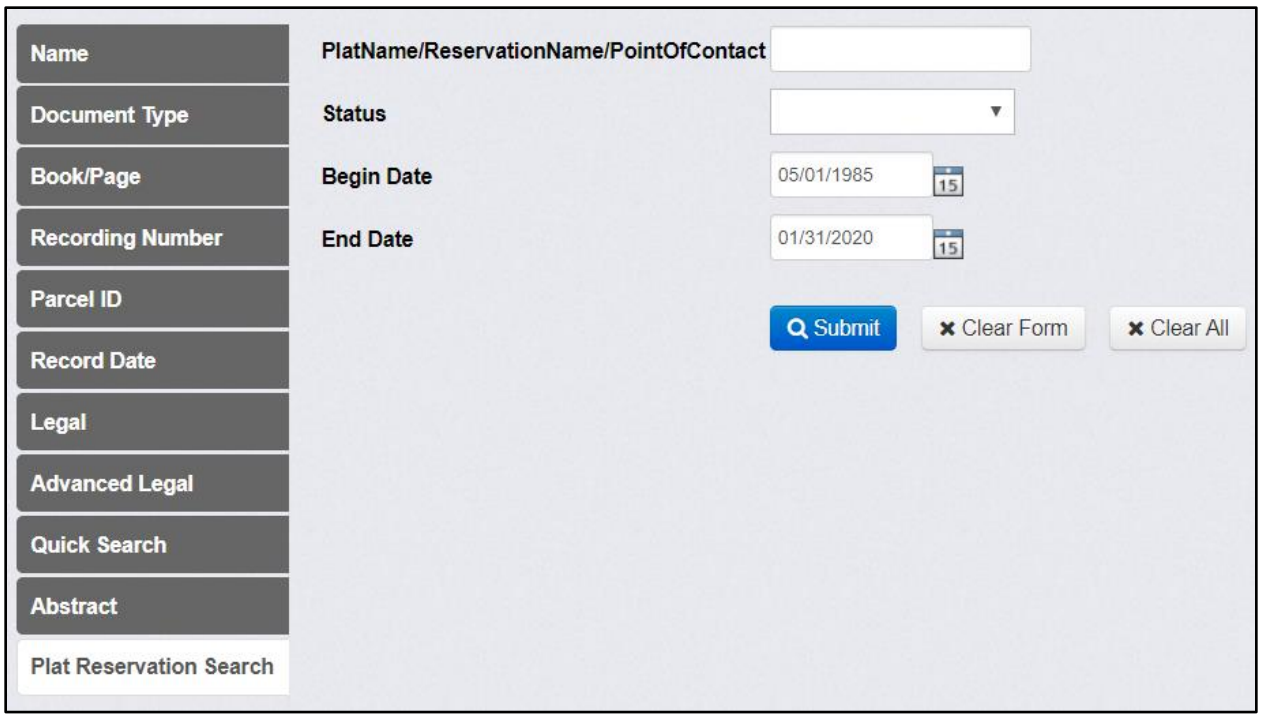

SettingKey	SettingValue
WebAdditionalMiscSearches	true

Id	Parameter	Prompt	ParameterType	Required	ComboListValue
10642	Name	PlatName/ReservationName/PointOfContact	string		
10854	Status	Status	string		DECLARE @TEMPTABLE TABLE (Display varchar(250),[Value] varchar(250)) INSERT INTO @TEMPTABLE values('Reserved','Reserved') INSERT INTO @TEMPTABLE values('Used','Used') INSERT INTO @TEMPTABLE values('Expired','Expired') SELECT * FROM @TEMPTABLE
10855	BeginDate	Begin Date	date		
10856	EndDate	End Date	date		

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

12060: Show All Legal Fields Button Option

Request Details: Add a control for the default state of the 'Show All Legal Fields' button.

Resolution: Changed the existing setting **WebShowAllLegalFieldsAvailable** to have the following configuration options:

0 – Do not show the button

1 – Show the button

2 – Show the button and default to ON

Added another new setting **WebLegalSearchFields.** This setting will control which legal fields appear in the search grid, and in what order they will appear.

12054: Updated Web Fee Calculator

Request Details: Users would like the ability for the Fee Calculator to work with date-reliant fees.

Resolution: The Fee Calculator has been updated to now check for fee disbursements. Only Documents that are Active and have not been Hidden From Web will appear in the Document Type dropdown of the Calculator.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

12055: Document Category Drop Down

Request Details: When the browser window is at certain reduced sizes, the Document Category drop down selection menu should still work as normal.

Resolution: The Document Category drop down selection menu will no longer instantly close when selected while the browser window is at a reduced size.

12056: Image Fit Setting

Request Details: Users would like a way to set whether images in the web Image Viewer default fit to height or width.

Resolution: Added setting **WebDefaultImageToFitHeight.** When true, images in the web Image Viewer will fit to height by default. When false, the viewer will default to fit by width.

Requires Admin Configuration.

12057: Page & Print Options

Request Details: Users would like the page and print options to take up less space.

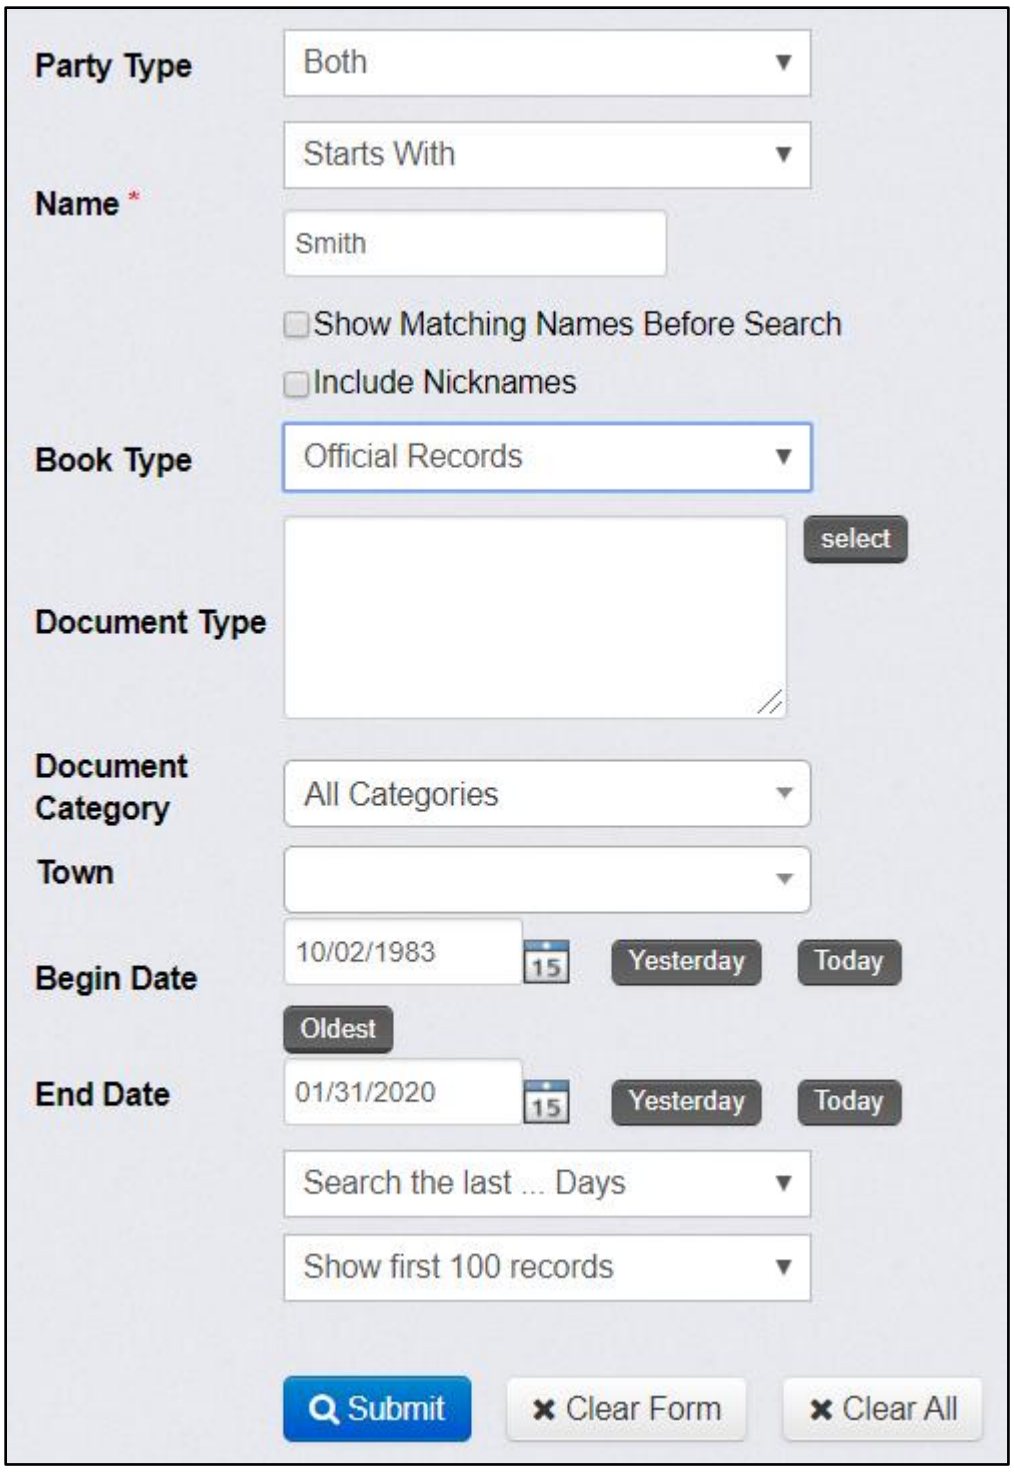

Resolution: Changed the layout of the page and print buttons on the top of the document screen to take up less space.

12058: Book Category Search Option

Request Details: Add Book Category search option to the Name search.

Resolution: Added the Book Type drop down to Name searches.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

12059: Matching Names Search

Request Details: Users would like to toggle the matching names search as well as toggle the search result list selection defaulting to all matching names or none.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Resolution: Modified setting **WebShowMatchingNameSearch.** When 0, the matching name search checkbox will be hidden. When 1, the matching name search checkbox will be available and the matching name list will default to select all names. When 2, the matching name search checkbox will be available and the matching name list will default to select no names.

Requires Admin Configuration.

12214: Hide Document Types from Fee Calculator

Request Details: Users need to be able to block certain document types from appearing in Landmark Web's Fee Calculator feature.

Resolution: Document Types can now have their WebHideFromFeeCalculator column changed. Configured Document Types will no longer be shown in the fee calculator.

12217: Configure Document Detail Tool Bar Buttons

Request Details: Users would like to configure the document detail image viewer's tool bar buttons so that the buttons all appear on the same row.

Resolution: Added settings **WebDocumentDetailsHideButtonText**, **WebDocumentDetailsHideGoToPage**, and **WebDocumentDetailsTransferButtonText**.

WebDocumentDetailsHideButtonText: When true, hides document detail tool bar button text.

WebDocumentDetailsHideGoToPage: When true, hides the Go to Page document detail tool bar function.

WebDocumentDetailsTransferButtonText: Controls the text on the Transfer Form document detail tool bar button.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 6

Corrected Issues

106183: Internal eRecording not Submitting Order

Request Details: When adding a document(s) through internal eRecording and selecting the "Submit Order" button, the user is kicked back to the order review screen and the order isn't created in the database.

Resolution: The eRecord order is now going into the database after the user select the "Submit Order" button.

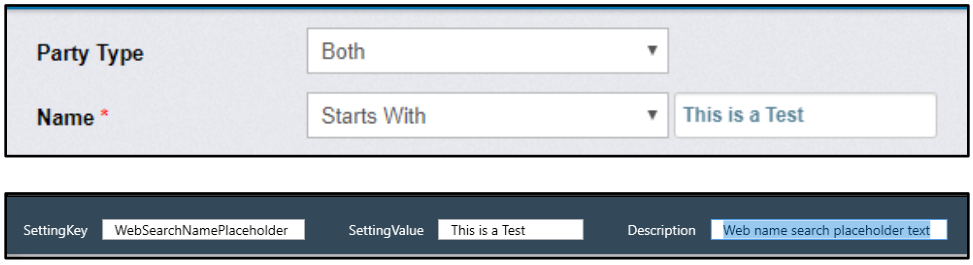

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

11509: Help Tip for Name Search

Request Details: Users would like a help tip to appear next to the name search box so they know which format to use for name searches.

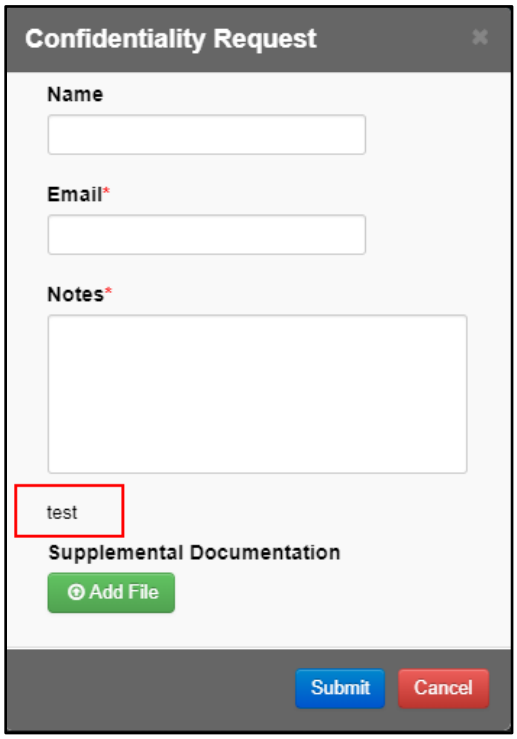

Resolution: A help tip will now appear next to the name search. The text of this tip is controlled by the new setting **WebSearchNamePlaceholder.** The value of this setting is what will appear on the search screen.

11761: Confidentiality Request Additional Information

Request Details: Users would like away to provide additional information on the confidentiality request pop-up.

Resolution: Added new additional information to the confidentiality request pop-up. This new text can be configured with the new setting **WebRedactionRequestAdditionalInformation.**

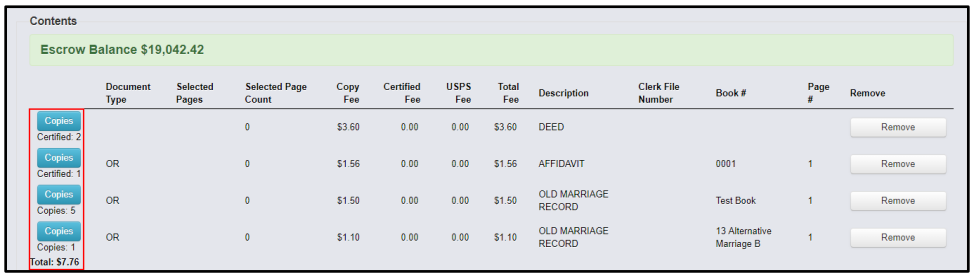

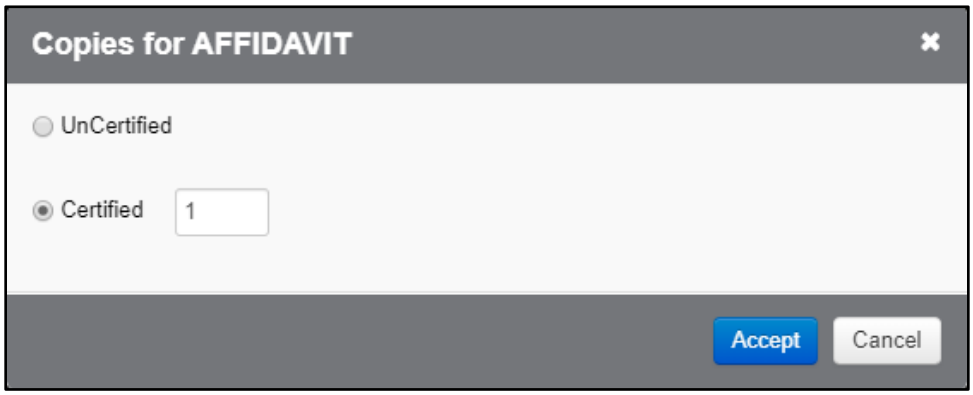

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

11863: Certified and Un-Certified Copies

Request Details: Users would like to be able to order certified and un-certified copies on one transaction.

Resolution: Users will now be able to use the new copies button to select the number of certified and un-certified copies for each document on the transaction. Added a new setting **WebCartCopiesPerDocument,** this setting must be true for the copies button to appear.

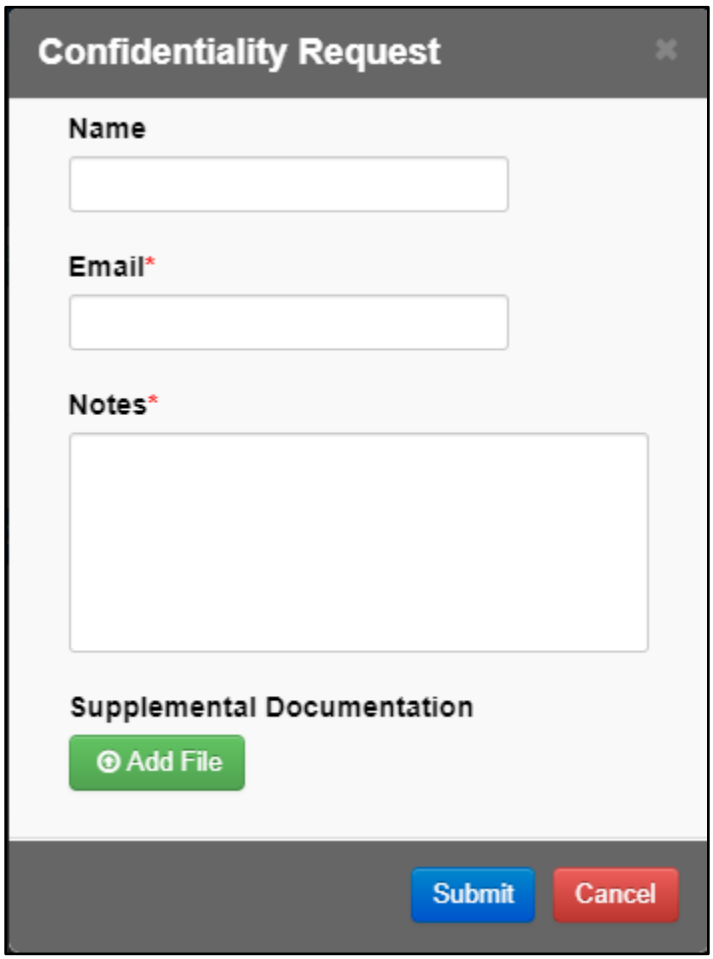

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

11994: Confidentiality Request

Request Details: Users would like Request Redaction to be changed to confidentiality request.

Resolution: The redaction request section will now say confidentiality request

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 4

Corrected Issues

105635: Redaction Request Nonfunctional

Expected Result: Redaction Request form should work regardless of setting configuration.

Resolution: Landmark Web Redaction Request form now works even if **WebRecordPrintHistory** setting is on.

106193: ERecord Submission Hang

Expected Result: Submitting PDFs through eRecord should not cause Landmark Web to hang or freeze.

Resolution: Fixed an issue where certain PDFs would not properly submit through eRecord.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

N/A

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 3

Corrected Issues

N/A

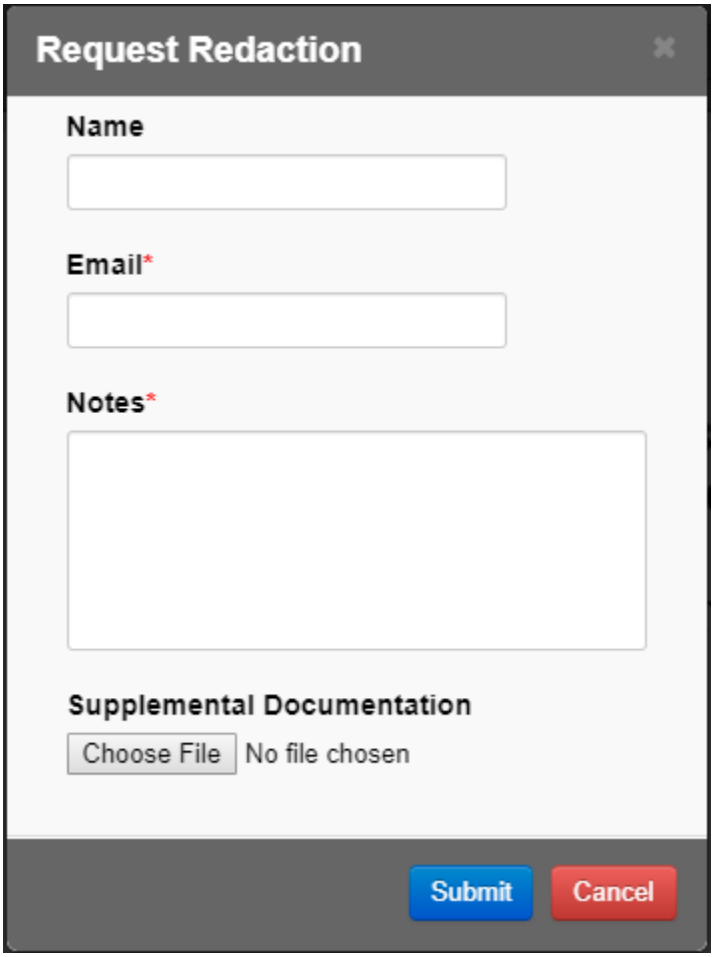

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

10925: Request Redactions

Expected Result: Users should be able to submit requests to redact documents.

Resolution: New Request Redaction button when viewing a document will bring up a form that users can complete to submit a redaction request, optionally with additional supplemental documents. Redaction requests will then be sent to the Landmark client for review, where judgement notifications will then be sent via email.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

11567: Completed Marriage/Civil Union Kiosks Refresh to Same Type

Expected Result: Users, upon completing a marriage license kiosk or a civil union license kiosk and starting a new kiosk, should be sent to a kiosk of the same type as the one just completed.

Resolution: Starting a new license with the Start New License button after submitting a marriage license kiosk will send the user to a marriage form, while starting a new license with the Start New License button after submitting a civil union license kiosk will send the user to a civil license form.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 2

Corrected Issues

104018: Document search Types Not displaying Properly

> ***Expected Result:*** The list of searched document types should not overlap with other buttons or text on the page.
>
> ***Resolution:*** Fixed text wrapping issue for paged and non-paged results.

104325: Show Matching Names Before Search GetResults Error

> ***Expected Result:*** Searching with the "Show Matching Names Before Search" enabled should not throw a GetResults() error.
>
> ***Resolution:*** Fixed issue with matching names search query.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

10884: Ability to Search by Abstract/Legal

Request Details: Add the ability to do an abstract/legal search on the web.

Resolution: Added Abstract search section to web Search page. New setting **WebSearchHelpAbstract** which will use HTML to determine what will show in the Help section of the Abstract Search screen.

Requires Admin Configuration.

10948: ADA Compliance

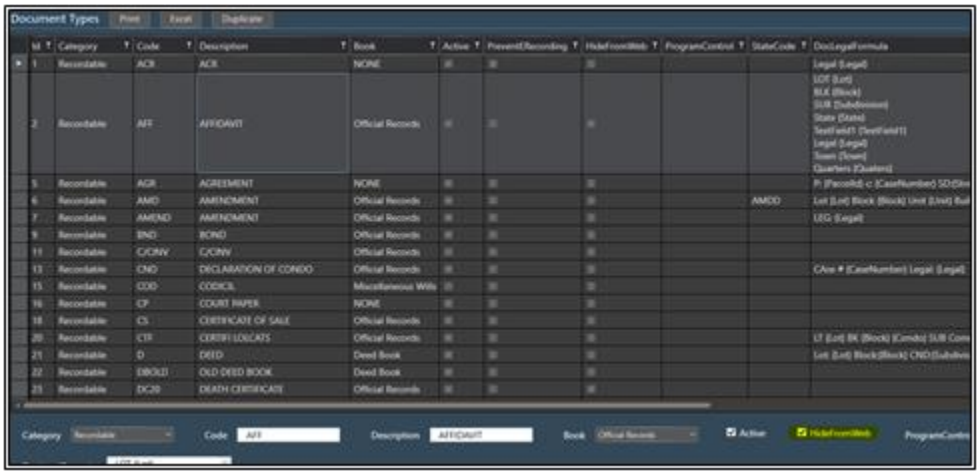

Request Details: Update all Landmark Web screens to be ADA Compliant.

Resolution: All Landmark Web screens have been reviewed using an ADA checking tool. Changes have been made to the offending areas. Landmark is now ADA Compliant.

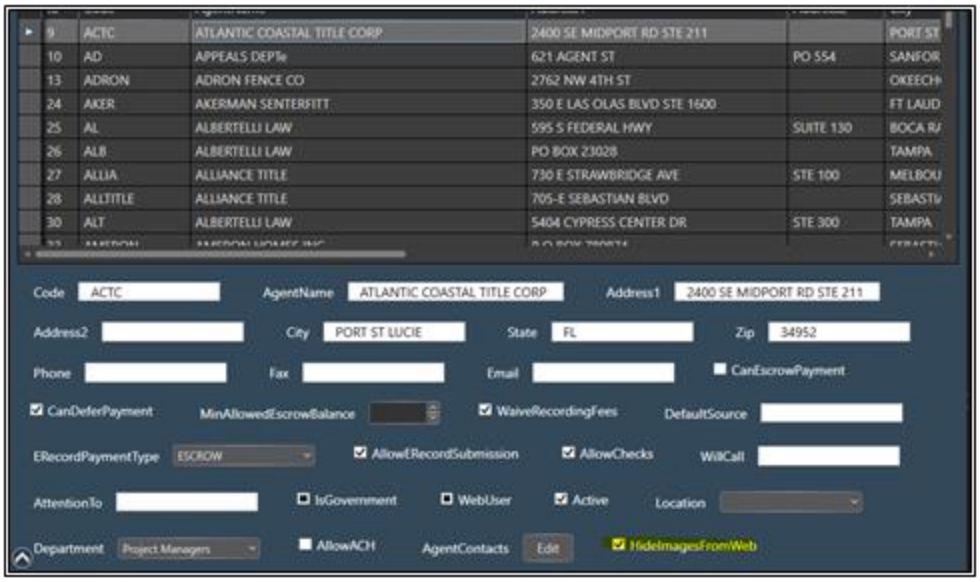

11311: Hide Document from Web by Doc Type or Agent Code

Request Details: Ability to hide images from appearing in Web based on agent code or document type.

Resolution: Added HideFromWeb to Doc Types, which hides images from the specified doc type from appearing on Web. Added HideImagesFromWeb to Agents, which hides images from documents recorded by the specified agent from appearing on Web.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

11440: Allow Access to Images with Doc Types FCP and ERSLT

Request Details: Allow access to specific document types without requiring payment.

Resolution: Added **FreeViewOnWeb** field to the DocumentType table. This field will be added to the database after the new web is installed and visited once.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Release 1.5 Service Pack 1

Corrected Issues

104290: Show Matching Names Before Search Error

Expected Results: Using the 'Show Matching Names' option on a name search should display the correct selection window and search results.

Resolution: Fixed an issue with the incorrect Order By in the matching names search query.

104735: Web Search Date Field Formatting

Expected Results: Editing the existing dates in the fields should not jumble up the digit formatting.

Resolution: Set all dates to use leading zeros. Anyone copying and pasting a date should take this into consideration.

104736: Search Page Refreshing Constantly

Expected Results: Searches should only refresh one time after the search is entered.

Resolution: Fixed an issue where pressing enter on search will make the search refresh multiple times.

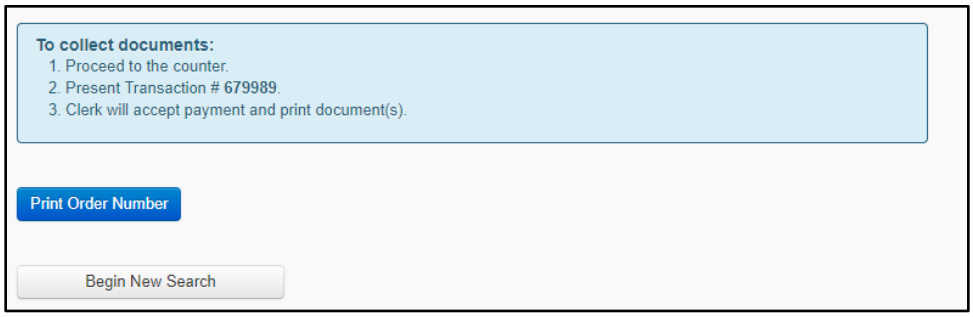

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

10891: Print Queue for Anonymous Shopper

Request Details: Users would like orders from anonymous shoppers to go to a print queue.

Resolution: Added a new prompt for anonymous shopper names. If an anonymous shopper elects to pay at counter, the copy order will be added to a print queue so anonymous shoppers can print a page that contains their transaction number.

11313: Only Display Group Information in Name/Legal Search

Request Details: When searching by name or legal, search results should only display names, legals, and doclinks for that search term's group.

Resolution: Added setting **ShowIndexGrouping**. When true, name and legal searches will only return names, legals, and doclinks from the search term's group. If the group number is NULL, it will default to 1.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

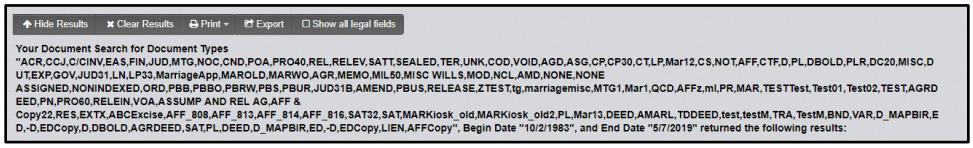

Release 1.5 Service Pack 0

Corrected Issues

104018: Doc Type List Wrapping

Expected Result: When searching for a long list of doc types, the list that appears in the grid should wrap properly.

Resolution: Fixed issue with doc type list wrapping

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.

Added Features

10948: ADA Compliance

Request Details: Fix any areas of the web that are not currently ADA compliant.

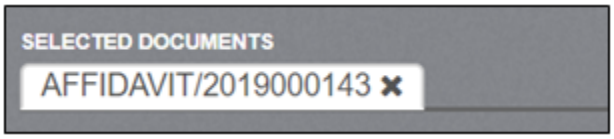

Resolution: Fixed all areas that were marked as being non-compliant by the axe Chrome plugin.

11045: My List Customization

Request Details: Add a setting so the text on the My List tabs can be customized.

Resolution: New setting **WebDocumentListFormat** to set the formatting for My List items. The setting uses C# to format the string.

Example: **Document.DocumentType.Description + "/" + Document.ClerkFileNumber**

Other string references:
Document.DocumentType.Code = Document Type Code
Document.BookNumber = Document Book Number
Document.PageNumber = Document Page Number

Requires Admin Configuration.

11196: Redaction Message on the Web

Request Details: When viewing a document that has not been redacted, the users should see a warning message.

Resolution: Users will now be able to configure the warning message on non-redacted images on the web. Added new setting **NotRedactImageMessage.** The warning message on the web will match the value of this new setting.

Requires Admin Configuration.

This document may contain confidential and/or proprietary information and is intended to be used only by licensed Landmark users. Any use by others is strictly prohibited.
